- I. **PURPOSE:** The purpose of this Request for Proposal (RFP) is to solicit proposals to establish a contract through competitive negotiations with one or more qualified vendors to provide emergency response services for collections stabilization and recovery to George Mason University's Libraries of George Mason University. George Mason University (herein after referred to as "Mason," or "University") is an educational institution and agency of the Commonwealth of Virginia.
- II. **PURCHASING MANUAL/GOVERNING RULES:** This solicitation and any resulting contract shall be subject to the provisions of the Commonwealth of Virginia *Purchasing Manual for Institutions of Higher Education and their Vendor's*, and any revisions thereto, and the *Governing Rules*, which are hereby incorporated into this contract in their entirety. A copy of both documents is available for review at: <https://vascupp.org>
- III. **COMMUNICATION:** Communications regarding the Request For Proposals shall be formal from the date of issuance until a contract has been awarded. Unless otherwise instructed offerors are to communicate with only the Procurement Officers listed on the cover page. Offerors are not to communicate with any other employees of Mason.
- IV. **FINAL CONTRACT:** ATTACHMENT B to this solicitation is Mason's standard two-party contract. It is the intent of this solicitation to base the final contractual documents off of Mason's standard two-party contract and Mason's General Terms and Conditions. Any exceptions to our standard contract and General Terms and Conditions should be denoted in your RFP response. Other documents may be incorporated into the final contract, either by way of attachment or by reference, but in all cases this contract document and Mason's General Terms and Conditions shall jointly take precedence over all other documents and will govern the terms and conditions of the contract.

As a public institution of higher education in Virginia Mason cannot agree to any of the following terms in any documents:

- A. An express or implied waiver of sovereign immunity.
- B. An agreement to indemnify, defend or hold harmless any entity.
- C. An agreement to maintain insurance.
- D. An agreement providing for binding arbitration.
- E. An agreement providing for the payment of attorneys' fees, costs of collection, or liquidated damages.
- F. Waiver of jury trial.
- G. Choice of law or venue other than the Commonwealth of Virginia.

Contracts will only be issued to the FEI/FIN Number and Firm listed on the signed cover page submitted in your RFP response. Joint proposals will not be accepted.

- V. **ADDITIONAL USERS:** It is the intent of this solicitation and resulting contract(s) to allow for cooperative procurement. Accordingly, any public body, public or private health or educational institutions, or affiliated corporations may access any resulting contract if authorized by the contractor.

Participation in this cooperative procurement is strictly voluntary. If authorized by the Contractor(s), the resultant contract(s) will be extended to the entities indicated above to purchase goods and services in accordance with contract terms. As a separate contractual relationship, the participating entity will place its own orders directly with the Contractor(s) and shall fully and independently administer its use of the contract(s) to include contractual disputes, invoicing and payments without direct administration from the University. No modification of this contract or execution of a separate agreement is required to participate; however, the participating entity and the Contractor may modify the terms and conditions of the contract to accommodate specific governing laws, regulations, policies, and business goals required by the participating entity. Any such modification will apply solely between the participating entity and the contractor.

The University may require the Contractor provide semi-annual usage reports for all entities accessing the contract. The University shall not be held liable for any costs or damages incurred by any other participating entity as a result of any authorization by the Contractor to extend the contract. It is understood and agreed that the University is not responsible for the acts or omissions of any entity and will not be considered in default of the contract no matter the circumstances.

Use of the resulting contract(s) does not preclude any participating entity from using other contracts or competitive processes as needed.

- VI. **eVA BUSINESS-TO-GOVERNMENT VENDOR REGISTRATION:** The eVA Internet electronic procurement solution, website portal [www.eVA.virginia.gov](http://www.eVA.virginia.gov), streamlines and automates government purchasing activities in the Commonwealth. The eVA portal is the gateway for vendors to conduct business with state agencies and public bodies. All vendors desiring to provide goods and/or services to the Commonwealth shall participate in the eVA Internet eProcurement solution by completing

the free eVA Vendor Registration. All bidders or offerors agree to self-register in eVA and pay the Vendor Transaction Fees prior to being awarded a contract. Registration instructions and transaction fees may be viewed at: <https://eva.virginia.gov/>

**VII. SWaM CERTIFICATION:** Vendor agrees to fully support the Commonwealth of Virginia and Mason’s efforts related to SWaM goals. Upon contract execution, eligible vendors (as determined by Mason and the Virginia Department of Small Business and Supplier Diversity) shall submit all required documents necessary to achieve SWaM certification to the Department of Small Business and Supplier Diversity within 90 days. Vendors currently SWaM certified agree to maintain their certification for the duration of the contract and shall submit all required renewal documentation at least 30 days prior to existing SWaM expiration. <https://www.sbsd.virginia.gov/>

**VIII. SMALL BUSINESS SUBCONTRACTING PLAN:** All potential offerors are required to fill out and submit Attachments A with their proposal.

Note: Invoices shall only be submitted to Mason by the entity awarded a contract. Subcontractors cannot submit invoices to Mason under any resulting contract.

**IX. PERIOD OF PERFORMANCE:** One (1) year from Effective Date of contract with four (4) successive one-year renewal options (or as negotiated).

**X. BACKGROUND:** George Mason University has an estimated enrollment of 36,000 students. The Mason Libraries consist of many libraries under one administration. The main library, Fenwick, and Gateway Library in the Johnson Center, as well as the University Records Center in the Facilities Warehouse are located on the original campus in Fairfax City. The Arlington Campus Library is located at 3401 N. Fairfax Dr., Arlington and the Mercer Library at 10900 University Blvd., Manassas. The library physical holdings consist of approximately 1,245,000 volumes, including approximately 156,000 bound journal volumes, and 310,000 government documents. In addition, there are 215,000 cartographic materials, 16,000 musical scores, 2,100,000 microforms, 24,000 audio and 32,000 film and video materials. The University collections’ estimated value is in excess of \$100 million dollars and include irreplaceable historic, cultural, and research property. The annual budget for materials is over \$9,800,000, of which over 75% goes toward electronic resources.

There have been incidents of water intrusion in all campus buildings housing library collections (Fenwick, Mercer, Arlington, and University Records Center) in the past that have impacted the libraries’ materials as well as donated materials requiring remediation before entering the building so as not to cross contaminate.

**XI. STATEMENT OF NEEDS:** The contractor shall furnish all labor, materials, and equipment as necessary to provide “as needed” emergency library disaster recovery services, including, but not limited to:

- on-site assessment of damage resulting from one or more natural or man-made catastrophic events;
- stabilization of building environments to minimize damage to collections resulting from mold growth;
- careful handling and secure removal of damaged library materials, papers, and research materials from disaster sites;
- environmentally controlled, round-trip transportation to appropriate storage venues for subsequent freezing, air drying, vacuum freeze drying, or shipping to firms for single-item conservation treatment, as appropriate;
- cleaning or smoke removal;
- building refurbishment;
- relocation of treated collections within their appropriate facilities;
- other related services as may be required to responsibly recover material owned by George Mason University Libraries.

This contract is primarily intended for use on mostly paper-based library or archival materials including, but not limited to; books and papers, manuscripts, administrative or other records and photographs. May also include microforms, films, videos, CDs or floppy discs, but not intended for recovery of electronic files or equipment, such as PCs or servers.

This contract is not intended for other conservation services, such as paper repairs, de-acidification or rebinding, services such as roof repair, plumbing or electrical work, mold abatement of buildings or services deemed to be hazardous in nature, such as asbestos abatement.

In addition to the stabilization, recovery, and cleaning of collection material, the cleaning of storage furniture (e.g. shelving, map cases, gasketed cabinets, etc.) and furniture (e.g. reading room tables, book carts, etc.) is within the scope of this contract.

In this contract, the University refers to stabilization as those activities that remove damaged materials from the disaster site and stabilize them for subsequent recovery efforts. Stabilization activities may include removal from emergency area, drying of collections in place, transportation to an off-site stabilization facility, or freezing of wet collection material. Recovery is defined as those activities that enable the material to be returned to its former condition or at a minimum be made fully accessible again on sanitized furniture in appropriate housing.

A. SERVICE RESPONSE REQUIREMENTS:

1. As part of the emergency response, describe how the Contractor shall:
  - a. Be reachable 24 hours/7 days a week/365 day a year to respond to a call for services.
  - b. Respond to disaster scene as soon as possible but no later than within 12 hours of being contacted by the Contract Administrator or their designated representative to assess the condition of the collections and work.
  - c. Be responsible for assigning sufficient personnel to the performance of this contract to ensure timely completion of all requirements.
  - d. Have scalable capability and resources (e.g., facilities, man power, management, equipment, supplies, transport, freezers, and logistics) to manage all types of emergencies that may affect the University collections regardless of size.
  - e. Have the experience, qualifications, and expertise to provide professional and standard methods of handling, stabilizing, packing, transporting, treating and rehousing, labeling and tracking (including the use of bar coding) the full range of library and archival materials in disaster situations.
  - f. Have the experience, qualifications, and expertise to provide professional and standard methods for mold remediation and other decontamination of collections and storage furniture.
  - g. Have all staff with the necessary qualifications and skills or shall have a network of vendors in place for additional resources. However, while some parts of the stabilization operations may be sub-contracted (for instance, to provide for increased freezer storage space), the coordination and majority of stabilization operations are expected to be conducted by the Contractor. All subcontractors for treatment or stabilization or housing must be agreed upon by Mason - see also Section XVI – Special Terms and Conditions.
  - h. Have adequate numbers of trained staff with the skills and experience to assess and sanitize (i.e., clean, disinfect, kill mold, and remove rust and other stains) designated storage furniture including shelving, map cases, and gasketed cabinets.
  - i. Use climate controlled, secure facilities. The Contractor is responsible for all aspects of security for Mason's materials in storage.
  - j. When specified by Mason, pack, ship, and store materials in protective totes and pallets (or other containers subsequently specified by Mason) that are clearly marked according to a numbering and tracking scheme approved by Mason.
  - k. Manage the total work effort associated with the required services to meet all objectives. Such management includes but is not limited to planning, scheduling, cost projecting and accounting, establishing and maintaining documentation and records, report preparation, and quality control.
  - l. Implement all necessary work control procedures to ensure timely accomplishment of work, as well as to permit tracking and reporting work in progress.

- m. Establish and maintain an internal comprehensive Quality Control program. The QC program will apply to all services rendered.
  - n. Maintain consistent, professional, and responsive communication throughout the project.
2. As part of the stabilizing collection material, describe how the Contractor shall:
- a. Provide professional advice to the Contract Administrator or his/her designated representative on the most practical and efficient options for the stabilization and recovery of the collections and storage systems within 36 hours of being contacted (or within 24 hours after the site visit).
  - b. Provide expert consultation on site to assess the condition of the collections and work with Mason's preservation experts to determine the type and amount of stabilization effort required as soon as the affected site is accessible.
  - c. Provide all trained labor, experienced supervision, approved material and supplies, and agreed upon equipment needed for cleanup in response to emergency calls at any of the Mason libraries.
  - d. Collaborate with Mason staff to create a stabilization plan documenting stabilization priority based on a variety of factors including type and extent of damage, type of material, rarity and/or importance of material, and outlining the methods to be used for retrieving, stabilizing, packing, and transporting designated damaged materials. To the extent possible, identify and inventory all affected materials and keep materials organized.
  - e. Be able to provide a stabilization plan on very short notice, striking a balance between the need for urgently removing affected collection material and doing so in a coordinated and well-thought out manner.
  - f. Collaborate with Mason preservation and curatorial staff, provide stabilization activities that result in proper packing and transportation of all materials being moved to temporary Contractor facilitated off-site storage location for stabilization or treatment.
  - g. Remove and stabilize materials in a timely manner to eliminate the risk of further damage to the collections. To the extent possible, the stabilization of materials should begin within 24 hours of the emergency and should be completed per the schedule outlined in the stabilization plan.
  - h. Provide all labor, material, and equipment for the safe and secure stabilization and transportation including dry cargo transport trucks or freezer trucks as needed and packing supplies, pallets, and materials needed to secure palletized containers.
  - i. Stabilize the affected collections items for transportation including providing all boxing, bagging, and other supports and containers necessary.
  - j. Establish an inventory of all affected items removed from the affected space as they are removed from a collection area for stabilization and treatment.
  - k. Provide consistent tracking of all collection material as they are repacked, transported, stabilized, treated and returned to Mason, ensuring the ability to locate an item at any point in time of stabilization and recovery activities.
  - l. Provide environmentally controlled transportation to appropriate storage venues for the stabilization and/or subsequent recovery of the affected collections items.
  - m. Provide secure freezer storage for the damaged materials in the event all available appropriate drying equipment is in use, or if the amount of material exceeds the Contractor's drying capacity.
3. As part of the recovering collection material, describe how the Contractor shall:

- a. Collaborate with the Contract Administrator or his/her designated representative to create a recovery plan before the recovery operations begin. This document should contain a description of the estimated quantity, value category, and type of affected collections items, the comprehensive condition assessment of damaged collections, proposal for the safe and secure recovery of the collections, treatment proposals and documentation, rehousing and labeling plans, proposed recovery schedule, tracking system, proposed return schedule, and a detailed associated cost estimate. The plan must also include details of proposed procedures, equipment/tools, goods/materials to be used and the name(s) of the supervisor and staff that will complete the work along with the estimated cost for labor hours, equipment/tools, and goods/materials. If fewer than 1,000 volumes are affected, the final recovery plan should be submitted within 14 days; if more than 1,000 volumes, within 30 days.
- b. Be able to systematically document all stages of the stabilization and recovery activities with a particular focus on treatment activities using both paper-based and/or, upon request, film based and dynamic media.
- c. Be equipped to provide specialized cleaning services as required to manage mold remediation, smoke and soot removal, and deodorization.
- d. Be equipped to dry, in a controlled and closely monitored manner, varying quantities of material exposed to varying amounts of moisture through the use of drying methods such as desiccant, air-drying or vacuum freeze-drying, to determine when materials have reached normal equilibrium, and to ensure that all items are completely dry without exposure to the risk of over-drying.
- e. Allow Mason to request recovery services separately from emergency response and stabilization services if Mason staff is able to perform the response and stabilization internally.
- f. Transfer wet, frozen or dry collection materials to a new, dry box if this is approved by Mason. If there is significant damage to the original container, the Contractor must provide Mason with a proposed procedure to transfer materials to new containers maintaining original order. The Contractor may be required to provide folders, boxes and containers approved by Mason or Mason may choose to provide containers. The Contractor must retain all original documentation and accompanying materials and any label or information written directly on the container.
- g. If distorted, books may be gently re-shaped while wrapping and packing. If packing in boxes, pack volumes spine down or flat into boxes. Avoid packing very small volumes next to large volumes. If deemed necessary, volumes that have been shrink-wrapped may have shrink-wrap plastic removed to expedite drying. Volumes to be transported that are too large for boxing in standard 1.2 cubic foot containers may be stacked flat on pallets, supported by thick cardboard sheets inserted between layers.
- h. Provide documentation including a signed manifest documenting all materials leaving any Mason facility. The Contractor must provide prompt notification upon receipt of shipment and inventory tracking while in the Contractor's facility.
- i. Physically secure collection materials to the truck interior to ensure that the containers and pallets do not shift during transit. All collection materials must be kept within original boxes or enclosures, unless the Preservation librarian or designee approves transfer to new boxes or enclosures. Materials must be retained in the same order as received and must not be commingled with any other materials at any time.
- j. Be equipped to recover a range of materials including but not limited to:
  - Bound volumes (including rare volumes on parchment, pith, vellum)
  - Books and other publications incorporating plastics and modern materials
  - Digital recordings (including CDs, DVDs, Optical Discs)

- Flat photographic prints, negatives, and direct positives on paper, film, glass, and/or other supports (including metal, leather, ceramics, etc.)
  - Microfilm rolls and fiche
  - Motion picture film
  - Magnetic media (including audio, data and sound recordings)
  - Oversized records (including architectural drawings and plans, cartographic records including maps, and posters)
  - Papers (including manuscripts, musical notations, unbound pages, etc.)
  - Video recordings (including DVDs, digital recordings, and magnetic media)
  - Artifacts (including ceramics, musical instruments, paintings, sculpture, and textile memorabilia, etc)
  - Audio recordings (including CDs, phonograph discs, digital sound, magnetic media, and wax cylinders)
- k. Mason collection material may be frozen in transit or at the Contractor's facility. When materials are to be frozen, the Contractor must provide assurance to the Mason representative that the materials in the interior of the pallet have been frozen within the specified timeframe. Documentation of temperature in the interior is sufficient. The temperature of the freezing facility must be monitored and documented. Cycling of the temperature within the freezing facility is unacceptable.
- l. Use freeze-drying equipment using a 24-hour computer-monitored vacuum freeze-drying process to return the moisture content of water-damaged materials/holdings to single digits (5-8% preferred). During vacuum freeze-drying, materials will be frozen to a temperature of at least -25°F. The Contractor must provide data to Mason documenting the conditions to which materials have been exposed, and the duration of these conditions.
- m. Outline methods and materials and/or storage systems for sanitization if biological growth and/or residues exist that are potentially harmful to users of collection materials or collection storage systems.
- n. Describe methods for dealing with the following types of materials:
- Oversize materials such as maps and cartographic materials
  - Flat photographic materials (printed on paper, film and/or other supports e.g. metal, glass, etc.)
  - Microfilm rolls
  - Motion picture film
  - Tangible digital media (videotape, audio tape, etc.) and digital recordings (CD, DVD, Optical Disc, etc.)
- o. Describe methods for consulting with Mason's Director of Special Collections Research Center (SCRC) or her designee if possible before recovering the SCRC materials (unique, rare or otherwise valuable collection material). The SCRC Director or designee shall authorize by written approval the Contractor's procedures for freezing or air-drying of these materials. The SCRC materials must remain at the same level of wetness as found until appropriate procedures have been determined and authorized.
4. As part of return of collection material, describe how the Contractor shall:
- a. Be able to, when treatment is completed, carefully pack dried materials separated by format and library location, in appropriate secure, non-damaging containers and ship/deliver them back to Mason. SCRC materials must be packed separately.
- b. Use bar coding to manage the inventory, tracking, shipping, and shelving process to facilitate tracking and reporting.

- c. Submit a close-out report, summarizing all actions taken by the Contractor as part of a Task Order. This report may summarize the emergency event and all associated activities, based on documentation produced through the previous documents, or may summarize recovery activities conducted under a separate Task Order.
5. Cost Estimate: If the Contract Administrator determines that the estimated cost is not fair and reasonable, Mason has the right to ask the Contractor to re-evaluate the estimate. An eVA Purchase Order will be issued to the Contractor as the authority to proceed with the work, which will incorporate the Contractor's estimate and the terms and conditions of the contract.

**XII. COST OF SERVICES**: Include hourly rates for all labor categories required to perform services (travel and expenses must be included in the hourly rates); price list for goods/materials normally required to perform services; and Contractor-owned equipment/tool costs required to perform the services.
