- MM. SUBCONTRACTS: No portion of the work shall be subcontracted without prior written consent from Mason. In the event that the Contractor desires to subcontract some part of the work specified herein, the Contractor shall furnish Mason the names, qualifications and experience of their proposed subcontractors. The Contractor shall, however, remain fully liable and responsible for the work to be done by its subcontractor(s) and shall assure compliance with all requirements of this Contract. This paragraph applies to, but is not limited to, subcontractor(s) who process University Data.

- NN. SWaM CERTIFICATION: Contractor agrees to fully support the Commonwealth of Virginia and Mason's efforts related to SWaM goals. Upon contract execution, Contractor, if eligible, shall submit all required documents necessary to achieve SWaM certification to the Department of Small Business and Supplier Diversity within 90 days. If Contractor is currently SWaM certified, Contractor agrees to maintain their certification for the duration of this Contract and shall submit all required renewal documentation at least 30 days prior to existing SWaM expiration at <https://www.sbsd.virginia.gov/>.

- OO. UNIVERSITY DATA: University Data includes all Mason owned, controlled, or collected PII and any other information that is not intentionally made available by Mason on public websites, including but not limited to business, administrative and financial data, intellectual property, and patient, student and personnel data. Contractor agrees to the following regarding University Data it may collect or process as part of this contract:

1. Contractor will use University Data only for the purpose of fulfilling its duties under the Contract and will not share such data with or disclose it to any third party without the prior written consent of Mason, except as required by the Contract or as otherwise required by law. University Data will only be processed by Contractor to the extent necessary to fulfill its responsibilities under the Contract or as otherwise directed by Mason.
2. University Data, including any back-ups, will not be accessed, stored, or transferred outside the United States without prior written consent from Mason. Contractor will provide access to University Data only to its employees and subcontractors who need to access the data to fulfill Contractor's obligations under the Contract. Contractor will ensure that employees who perform work under the Contract have read, understood, and received appropriate instruction as to how to comply with the data protection provisions of the Contract and to maintain the confidentiality of the University Data.
3. The parties agree that as between them, all rights including all intellectual property rights in and to University

Data shall remain the exclusive property of Mason, and Contractor has a limited, nonexclusive license to use the University Data as provided in the Contract solely for the purpose of performing its obligations under the Contract. The Contract does not give a party any rights, implied or otherwise, to the other party's data, content, or intellectual property, except as expressly stated in the Contract.

4. Contractor will take reasonable measures, including audit trails, to protect University Data against deterioration or degradation of data quality and authenticity. Contractor shall be responsible for ensuring that University Data, per the Virginia Public Records Act, is preserved, maintained, and accessible throughout their lifecycle, including converting and migrating electronic data as often as necessary so that information is not lost due to hardware, software, or media obsolescence or deterioration.
5. Contractor shall notify Mason within three business days if it receives a request from an individual under any applicable law regarding PII about the individual, including but not limited to a request to view, access, delete, correct, or amend the information. Contractor shall not take any action regarding such a request except as directed by Mason.
6. If Contractor will have access to University Data that includes "education records" as defined under the Family Educational Rights and Privacy Act (FERPA), the Contractor acknowledges that for the purposes of the Contract it will be designated as a "school official" with "legitimate educational interests" in the University education records, as those terms have been defined under FERPA and its implementing regulations, and the Contractor agrees to abide by the limitations and requirements imposed on school officials. Contractor will use the education records only for the purpose of fulfilling its duties under the Contract for Mason's and its end user's benefit, and will not share such data with or disclose it to any third party except as provided for in the Contract, required by law, or authorized in writing by the University.
7. Mason may require that Mason and Contractor complete a Data Processing Addendum ("DPA"). If a DPA is completed, Contractor agrees that the information in the DPA is accurate. Contractor will only collect or process University Data that is identified in the DPA and will only handle that data (e.g., type of processing activities, storage, security, disclosure) as described in the DPA. If Contractor intends to do anything regarding University Data that is not reflected in the DPA, Contractor must request an amendment to the DPA and may not take the intended action until the amendment is approved and documented by Mason.

PP. UNIVERSITY DATA SECURITY: Data security is of paramount concern to Mason. Contractor will utilize, store and process University Data in a secure environment in accordance with commercial best practices, including appropriate administrative, physical, and technical safeguards, to secure such data from unauthorized access, disclosure, alteration, and use. Such measures will be no less protective than those used to secure Contractor's own data of a similar type, and in no event less than reasonable in view of the type and nature of the data involved. At a minimum, Contractor shall use industry-standard and up-to-date security tools and technologies such as anti-virus protections and intrusion detection methods to protect University Data.

Immediately upon becoming aware of circumstances that could have resulted in unauthorized access to or disclosure or use of University Data, Contractor will notify Mason, fully investigate the incident, and cooperate fully with Mason's investigation of and response to and remediation of the incident. Except as otherwise required by law, Contractor will not provide notice of the incident directly to individuals who's PII was involved, regulatory agencies, or other entities, without prior written permission from Mason.

If Contractor provides goods and services that require the exchange of sensitive University Data, the Data Security Addendum attached to this Contract provides additional requirements Contractor must take to protect the University Data. Mason reserves the right to determine whether the University Data involved in this contract is sensitive, and if it so determines it will provide the Data Security Addendum to Contractor and it will be attached to and incorporated into this contract. Types of University Data that may be considered sensitive include, but is not limited to, (1) PII; (2) credit card data; (3) financial or business data which has the potential to affect the accuracy of the University's financial statements; (4) medical or health data; (5) sensitive or confidential business information; (6) trade secrets; (7) data which could create a security (including IT security) risk to Mason; and (8) confidential student or employee information.

Mason reserves the right in its sole discretion to perform audits of Contractor, at Mason's expense, to ensure compliance with all obligations regarding University Data. Contractor shall reasonably cooperate in the performance of such audits. Contractor will make available to Mason all information necessary to demonstrate compliance with its

data processing obligations. Failure to adequately protect University Data or comply with the terms of this Contract with regard to University Data may be grounds to terminate this Contract.

QQ. UNIVERSITY DATA UPON TERMINATION OR EXPIRATION: Upon termination or expiration of the Contract, Contractor will ensure that all University Data are securely returned or destroyed as directed by Mason in its sole discretion within 180 days of the request being made. Transfer to Mason or a third party designated by Mason shall occur within a reasonable period of time, and without significant interruption in service. Contractor shall ensure that such transfer/migration uses facilities and methods that are compatible with the relevant systems of Mason or its transferee, and to the extent technologically feasible, that Mason will have reasonable access to University Data during the transition. In the event that Mason requests destruction of its data, Contractor agrees to destroy all data in its possession and in the possession of any subcontractors or agents to which the Contractor might have transferred University Data. Contractor agrees to provide documentation of data destruction to the University.

Contractor will notify the University of any impending cessation of its business and any contingency plans. This includes immediate transfer of any previously escrowed assets and University Data and providing Mason access to Contractor's facilities to remove and destroy Mason-owned assets and University Data. Contractor shall implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to Mason. Contractor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to Mason. Contractor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and effect on Mason, all such work to be coordinated and performed in advance of the formal, final transition date.

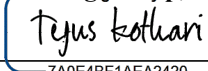

RR. UNIVERSITY REVIEW/APPROVAL: All goods, services, products, design, etc. produced by the Contractor for or on behalf of Mason are subject to Mason's review and approval. In the event Mason does not provide notice of any defects in the deliverables within thirty (30) days of completion or receipt of any deliverables, then the deliverables shall be deemed accepted by Mason for purposes of this Contract.

SS. WAIVER: The failure of a party to enforce any provision in this Contract shall not be deemed to be a waiver of such right.

TT. DISCLAIMER: Notwithstanding the foregoing, Mason acknowledges and agrees that BCG does not provide fairness opinions or valuations of market transactions or legal, accounting or tax advice.

UU. NO THIRD-PARTY BENEFICIARIES: Mason agrees that Contractor will not be responsible for any damages incurred or claims made by Mason or any third party as a result of or in connection with the disclosure, or the third party's use of, or reliance on any Contractor's services and/or work products.

- OO. UNIVERSITY DATA: University Data includes all Mason owned, controlled, or collected PII and any other information that is not intentionally made available by Mason on public websites, including but not limited to business, administrative and financial data, intellectual property, and patient, student and personnel data. Contractor agrees to the following regarding University Data it may collect or process as part of this Contract:
1. Contractor will use University Data only for the purpose of fulfilling its duties under the Contract and will not share such data with or disclose it to any third party without the prior written consent of Mason, except as required by the Contract or as otherwise required by law. University Data will only be processed by Contractor to the extent necessary to fulfill its responsibilities under the Contract or as otherwise directed by Mason.
 2. University Data, including any back-ups, will not be accessed, stored, or transferred outside the United States without prior written consent from Mason. Contractor will provide access to University Data only to its employees and subcontractors who need to access the data to fulfill Contractor's obligations under the Contract. Contractor will ensure that employees who perform work under the Contract have read, understood, and received appropriate instruction as to how to comply with the data protection provisions of the Contract and to maintain the confidentiality of the University Data.
 3. The parties agree that as between them, all rights including all intellectual property rights in and to University Data shall remain the exclusive property of Mason, and Contractor has a limited, nonexclusive license to use the University Data as provided in the Contract solely for the purpose of performing its obligations under the Contract. The Contract does not give a party any rights, implied or otherwise, to the other party's data, content, or intellectual property, except as expressly stated in the Contract.
 4. Contractor will take reasonable measures, including audit trails, to protect University Data against deterioration or degradation of data quality and authenticity. Contractor shall be responsible for ensuring that University Data, per the Virginia Public Records Act, is preserved, maintained, and accessible throughout their lifecycle, including converting and migrating electronic data as often as necessary so that information is not lost due to hardware, software, or media obsolescence or deterioration.
 5. Contractor shall notify Mason within three business days if it receives a request from an individual under any applicable law regarding PII about the individual, including but not limited to a request to view, access, delete, correct, or amend the information. Contractor shall not take any action regarding such a request except as directed by Mason.
 6. If Contractor will have access to University Data that includes "education records" as defined under the Family Educational Rights and Privacy Act (FERPA), the Contractor acknowledges that for the purposes of the Contract it will be designated as a "school official" with "legitimate educational interests" in the University education records, as those terms have been defined under FERPA and its implementing regulations, and the Contractor agrees to abide by the limitations and requirements imposed on school officials. Contractor will use the education records only for the purpose of fulfilling its duties under the Contract for Mason's and its end user's benefit, and will not share such data with or disclose it to any third party except as provided for in the Contract, required by law, or authorized in writing by the University.
 7. Mason may require that Mason and Contractor complete a Data Processing Addendum ("DPA"). If a DPA is completed, Contractor agrees that the information in the DPA is accurate. Contractor will only collect or process University Data that is identified in the DPA and will only handle that data (e.g., type of processing activities, storage, security, disclosure) as described in the DPA. If Contractor intends to do anything regarding University Data that is not reflected in the DPA, Contractor must request an amendment to the DPA and may not take the intended action until the amendment is approved and documented by Mason.
- PP. UNIVERSITY DATA SECURITY: Data security is of paramount concern to Mason. Contractor will utilize, store and process University Data in a secure environment in accordance with commercial best practices, including appropriate administrative, physical, and technical safeguards, to secure such data from unauthorized access, disclosure, alteration, and use. Such measures will be no less protective than those used to secure Contractor's own data of a similar type, and in no event less than reasonable in view of the type and nature of

the data involved. At a minimum, Contractor shall use industry-standard and up-to-date security tools and technologies such as anti-virus protections and intrusion detection methods to protect University Data.

1. Immediately upon becoming aware of circumstances that could have resulted in unauthorized access to or disclosure or use of University Data, Contractor will notify Mason, fully investigate the incident, and cooperate fully with Mason's investigation of and response to and remediation of the incident. Except as otherwise required by law, Contractor will not provide notice of the incident directly to individuals who's PII was involved, regulatory agencies, or other entities, without prior written permission from Mason.
2. If Contractor provides goods and services that require the exchange of sensitive University Data, the Data Security Addendum attached to this Contract provides additional requirements Contractor must take to protect the University Data. Mason reserves the right to determine whether the University Data involved in this Contract is sensitive, and if it so determines it will provide the Data Security Addendum to Contractor and it will be attached to and incorporated into this contract. Types of University Data that may be considered sensitive include, but is not limited to, (1) PII; (2) credit card data; (3) financial or business data which has the potential to affect the accuracy of the University's financial statements; (4) medical or health data; (5) sensitive or confidential business information; (6) trade secrets; (7) data which could create a security (including IT security) risk to Mason; and (8) confidential student or employee information.
3. Mason reserves the right in its sole discretion to perform audits of Contractor, at Mason's expense, to ensure compliance with all obligations regarding University Data. Contractor shall reasonably cooperate in the performance of such audits. Contractor will make available to Mason all information necessary to demonstrate compliance with its data processing obligations. Failure to adequately protect University Data or comply with the terms of this Contract with regard to University Data may be grounds to terminate this Contract.

QQ. UNIVERSITY DATA UPON TERMINATION OR EXPIRATION: Upon termination or expiration of the Contract, Contractor will ensure that all University Data are securely returned or destroyed as directed by Mason in its sole discretion within 180 days of the request being made. Transfer to Mason or a third party designated by Mason shall occur within a reasonable period of time, and without significant interruption in service. Contractor shall ensure that such transfer/migration uses facilities and methods that are compatible with the relevant systems of Mason or its transferee, and to the extent technologically feasible, that Mason will have reasonable access to University Data during the transition. In the event that Mason requests destruction of its data, Contractor agrees to destroy all data in its possession and in the possession of any subcontractors or agents to which the Contractor might have transferred University Data. Contractor agrees to provide documentation of data destruction to the University.

Contractor will notify the University of any impending cessation of its business and any contingency plans. This includes immediate transfer of any previously escrowed assets and University Data and providing Mason access to Contractor's facilities to remove and destroy Mason-owned assets and University Data. Contractor shall implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to Mason. Contractor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to Mason. Contractor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and effect on Mason, all such work to be coordinated and performed in advance of the formal, final transition date.

RR. UNIVERSITY REVIEW/APPROVAL: All goods, services, products, design, etc. produced by the Contractor for or on behalf of Mason are subject to Mason's review and approval.

SS. WAIVER: The failure of a party to enforce any provision in this Contract shall not be deemed to be a waiver of such right.

1. Executive Summary

Mason is positioning itself to engage in innovative ventures that will support the mission and strategic plan of the University and citizens of the Commonwealth of Virginia and is seeking consultants for support with strategic initiatives, benchmarking analyses, financial management, and new partnership-oriented ventures.

Mason has already established a track record of innovation across its three campuses in Northern Virginia, its campus in South Korea, and its online platform – including strategic relationships with local economic development organizations, incubators, non-profits, service providers, and industry partners. These types of partnerships will provide Mason with the resources and capabilities required to extend its reach while providing transformative educational and entrepreneurial opportunities to its students and community. For example:

- Through its interconnected programs, last year the Mason Enterprise team provided 27,000 hours of 1:1 counseling to more than 10,000 small businesses, covering every county in the Commonwealth and delivered 859 small business and entrepreneurial training programs to 18,000 Virginia attendees, the majority of served businesses being owned/led by women and/or racial/ethnic minorities.
- Mason is investing in online programming to meet the various needs of the diverse populations it serves and harmonizing its student support models to better serve students, regardless of the modality in which they choose to attend Mason. Further, Mason is leveraging these new technologies to serve new markets, such as displaced workers seeking training and reskilling for new career opportunities.
- Mason is rolling out a Coulter model program to address commercialization of technologies in digital innovation. This program will address the gap in prototype development by involving an oversight committee of industry and investment professionals to move technologies forward.

BCG is ideally positioned to support Mason in launching and managing future innovative ventures. We have extensive experience supporting public and private higher education institutions in strategy development, initiative implementation, and organizational transformation, among other topics. For example:

- Evaluating **strategic growth** opportunities and creating implementation plans
- Launching and managing **strategic partnerships** over the whole project life cycle
- Helping universities to achieve their broader strategic goals with the **right organization, operating model, and execution capabilities**

We are committed to working closely with you to develop project approaches that are fit for purpose and tailored to Mason's needs. We are prepared to deploy a consulting team including Partners, Senior Advisors, Project Managers, Consultants and other experts with deep expertise in higher education, drawing from BCG's 100+ higher education projects in the past five years in North America, and several team members with a wealth of prior experience "in the seat" in higher education leadership positions.

We look forward to the opportunity to work together on this critical effort to drive innovation, improve outcomes, and continue Mason's journey to become a leader in 21st century education.

We are committed to:

- Providing unparalleled opportunities for personal growth
- Succeeding together with passion and trust

BCG has developed proprietary methodologies, tools, and frameworks, leveraging knowledge gained from over 50 years of client work around the world. Our tools and approaches reflect broad and deep experience in supporting complex organizational change. We have invested in methodologies and tools to ensure that we can successfully help our clients deliver large-scale improvements in their outcomes across functions and locations. Our toolkit reflects deep expertise in specific industries (e.g., higher education operating models) and specific functions (e.g., organization design, pricing, partnerships), and in helping all our clients manage both the organizational discipline and cultural change required for real change to take hold and persist over time.

We believe this makes us uniquely qualified to support Mason as it positions itself to engage in innovative ventures that will support the mission and strategic plan of the University and citizens of the Commonwealth of Virginia. Specifically, we will draw on the following differentiating factors as we partner with you on this effort:

- **A strategic perspective** rooted in our 50-plus year heritage as a thought leader in strategy consulting
- **Extensive experience supporting higher education clients** in defining and executing transformative strategies, supported by a robust set of tools and methodologies
- **A distinctive working style** that combines a desire to bring facts to the table and a willingness to push our clients with a high degree of collaboration and hands-on engagement from the full team including our Partners and senior experts

2.1 Strategic perspective

Since its founding, BCG has been recognized as a cutting-edge thought leader in strategy. It is a core part of our DNA, reaching back to our work on the experience curve and growth share matrix in the 1960s. We publish extensively on key current strategic issues, such as long-term visioning, business model innovation, intellectual property, and information economics. In addition, BCG has an in-house Strategy Institute, by means of which

we are driving strategic innovation through collaboration with thought leaders in academia with specialties outside of business. By working with academia, we are at the forefront of thinking on strategy and we constantly iterate our problem solving approach in order to find the best solutions with our clients. Our clients value our consistently innovative approach as evidenced by our high number of returning clients.

BCG is recognized as global leader in management consulting:

"The Boston Consulting Group is the most influential source of strategic advice worldwide."

– Financial Times

"The most profound conceptual innovation in management consulting over the last decades was initiated by The Boston Consulting Group"

– The Economist

"I like some consultants: those who make you think. The Boston Consulting Group is the most interesting of the consulting companies, because they question fundamentally what's going on."

– Tom Peters, Author of "In Search of Excellence"

2.2 Experience in higher education

We have deep experience in higher education and a track record of helping institutions and systems succeed. We have supported a diverse cross-section of universities and systems including the leading public and private institutions, domestically and globally, listed in the section below.

As a firm, BCG has been at the forefront of strategy development, transformation, and operational and financial excellence for decades. We have demonstrated this in higher education over the past 5 years with over 100 projects in North America alone. We have helped universities soar to new heights in extending their missions, while operating more efficiently and effectively.

BCG has developed proprietary methodologies, tools, and frameworks, anchored in knowledge gained from over 50 years of experience. Our tools and approaches reflect broad and deep experience in supporting complex organizational change. We have invested in methodologies and tools to ensure that we can successfully help our clients around the world deliver large-scale improvements in their outcomes across functions. Our toolkit reflects deep expertise in specific industries (e.g., higher education operating models) and specific functions (e.g., organization design, analytics, IT implementation, pricing, partnerships), and in helping all our clients manage both the organizational discipline and cultural change required for real transformations to take hold and persist over time.

Our scale, depth of experience, and breadth of expertise enable BCG to assemble a team of relevant experts quickly across a very wide range of potential topics. Bios of selected BCG leaders with relevant expertise for Mason are provided in the Appendix.

2.3 Our working style

The combination of our expert team and a highly collaborative, flexible working style gives BCG the ability to "co-create" the answer and outcome with our clients.

BCG has a proud heritage of teamwork within our own firm. Project teams are comprised of small groups who work together daily for the full duration of the project. A "flat" organization, the perspective of every member from the junior consultant to the senior partner is valued. We believe this philosophy is most clearly reflected in the fact that BCG is the only consulting firm consistently ranked among *Fortune* magazine's top ten places to work. We bring this commitment to teamwork, collaboration, and stakeholder engagement to any project we are a part of. Client feedback indicates that BCG is the most collaborative major consulting firm. We think this stems from our belief in developing strong relationships and in deeply understanding our clients' experiences. BCG teams prioritize thoughtful co-location with our clients, along with use of technology and norms that

enable high-quality hybrid and virtual engagement, collectively enabling us to work side-by-side with your team through a range of formal and informal interactions.

Our collaborative working style is also evident in our approach to engaging stakeholders across our clients' organizations. We co-develop and work from a clear stakeholder engagement plan which identifies relevant groups / individuals to engage (e.g., students, faculty, employers), determines the best channels to engage each group (e.g., interviews, focus groups, surveys), and develops a detailed engagement calendar which allows us to track interactions against our plan. In every stakeholder interaction, we work with our clients to provide transparency into when and how stakeholders will be engaged going forward and how their input will be incorporated. We ground each stakeholder discussion in facts and set up explicit mechanisms to share stakeholder input across the client's project leadership group. We approach this process as part of our clients' existing long-term relationships with their stakeholders, rather than as a discrete, episodic set of meetings. Accordingly, we partner with our clients to think proactively about when it makes sense for BCG to lead versus when a member of the client's team should be in the front of the room.

We understand that faculty play a particularly important role in academic institutions, and our approach to engaging faculty is illustrative of our broader stakeholder engagement approach. While the specifics vary depending on the project, we often partner with our clients in gathering input from faculty, shaping strategies and building alignment through multiple channels, including town halls, small group discussions, 1-on-1 interviews, and open "office hours" as appropriate. We also help our clients identify opportunities for faculty to own and contribute to initiatives, such as identifying a cohort of faculty members to both guide and champion a specific initiative.

The ultimate goal of the stakeholder engagement we support is to develop and/or enrich strong working relationships with stakeholders in which they are encouraged to provide input, included in the solution development process, and empowered to take ownership of implementation and long-term success of strategic initiatives. The importance of this structured process for implementation success cannot be underestimated. We support our clients using tools, techniques and approaches that BCG has employed around the world in complex stakeholder environments, particularly in the public sector.

4. Approach: Specific plans and/or methodology to be used to perform services

From our extensive work in higher education, our expertise spans 16 of the 18 areas Mason is seeking in a consulting partner. Multiple focus areas are often addressed in parallel over the course of a single engagement with an institution (e.g., strategy development), whereas other focus areas can be standalone and have discrete approaches (e.g., leadership assessment & coaching).

In this section, we provide common BCG approaches through six illustrative project archetypes. It is important to note that, while we aim here to illustrate a variety of BCG tools and capabilities that align with your requirements, these approaches are not comprehensive of all BCG project archetypes and we partner closely with our clients to co-develop a tailored approach for each engagement.

We believe that all of these archetypes reflect BCG’s ability to assemble a team of experts in education and other relevant disciplines quickly (requirement 17). For more information on selected potential team members, please see the Appendix.

The table below provides a summary of how these archetypes align with your requirements. Further information on specific approaches and methodologies can be found below the table.

7.1 Team biographies

Our flexible staffing approach allows us to tailor our project teams to have the right skills and expertise for each specific engagement. This enables us to draw from our breadth of experience in higher education; it also means we are able to tap into resources from our other practice areas, such as our Technology Advantage or People and Organization practices, according to the needs of each project. We are able to assemble teams which incorporate best practices from across industries to produce cutting-edge insights and drive impact in higher education.

We are excited by the level of ambition in Mason's strategic plan and will align our top education resources accordingly. In the following pages we have provided brief biographies of the core education team we would choose from to support Mason's strategic initiatives.

Project team

The leadership team will be supported by a project team selected from our pool of consultants experienced in higher education, strategy, and/or organizational transformation, and who in most cases will be 100% dedicated to a given project. Given the nature of BCG's staffing model, we will confirm precise staffing based on the needs of a given project and the exact time of project start. Given our large volume of relevant work, we are able to staff experienced teams quickly in support of higher education clients.

- OO. **UNIVERSITY DATA:** University Data includes all Mason owned, controlled, or collected PII and any other information that is not intentionally made available by Mason on public websites, including but not limited to business, administrative and financial data, intellectual property, and patient, student and personnel data. Contractor agrees to the following regarding University Data it may collect or process as part of this Contract:
1. Contractor will use University Data only for the purpose of fulfilling its duties under the Contract and will not share such data with or disclose it to any third party without the prior written consent of Mason, except as required by the Contract or as otherwise required by law. University Data will only be processed by Contractor to the extent necessary to fulfill its responsibilities under the Contract or as otherwise directed by Mason.
 2. University Data, including any back-ups, will not be accessed, stored, or transferred outside the United States without prior written consent from Mason. Contractor will provide access to University Data only to its employees and subcontractors who need to access the data to fulfill Contractor's obligations under the Contract. Contractor will ensure that employees who perform work under the Contract have read, understood, and received appropriate instruction as to how to comply with the data protection provisions of the Contract and to maintain the confidentiality of the University Data.
 3. The parties agree that as between them, all rights including all intellectual property rights in and to University Data shall remain the exclusive property of Mason, and Contractor has a limited, nonexclusive license to use the University Data as provided in the Contract solely for the purpose of performing its obligations under the Contract. The Contract does not give a party any rights, implied or otherwise, to the other party's data, content, or intellectual property, except as expressly stated in the Contract.
 4. Contractor will take reasonable measures, including audit trails, to protect University Data against deterioration or degradation of data quality and authenticity. Contractor shall be responsible for ensuring that University Data, per the Virginia Public Records Act, is preserved, maintained, and accessible throughout their lifecycle, including converting and migrating electronic data as often as necessary so that information is not lost due to hardware, software, or media obsolescence or deterioration.
 5. Contractor shall notify Mason within three business days if it receives a request from an individual under any applicable law regarding PII about the individual, including but not limited to a request to view, access, delete, correct, or amend the information. Contractor shall not take any action regarding such a request except as directed by Mason.
 6. If Contractor will have access to University Data that includes "education records" as defined under the Family Educational Rights and Privacy Act (FERPA), the Contractor acknowledges that for the purposes of the Contract it will be designated as a "school official" with "legitimate educational interests" in the University education records, as those terms have been defined under FERPA and its implementing regulations, and the Contractor agrees to abide by the limitations and requirements imposed on school officials. Contractor will use the education records only for the purpose of fulfilling its duties under the Contract for Mason's and its end user's benefit, and will not share such data with or disclose it to any third party except as provided for in the Contract, required by law, or authorized in writing by the University.

7. Mason may require that Mason and Contractor complete a Data Processing Addendum (“DPA”). If a DPA is completed, Contractor agrees that the information in the DPA is accurate. Contractor will only collect or process University Data that is identified in the DPA and will only handle that data (e.g., type of processing activities, storage, security, disclosure) as described in the DPA. If Contractor intends to do anything regarding University Data that is not reflected in the DPA, Contractor must request an amendment to the DPA and may not take the intended action until the amendment is approved and documented by Mason.

PP. UNIVERSITY DATA SECURITY: Data security is of paramount concern to Mason. Contractor will utilize, store and process University Data in a secure environment in accordance with commercial best practices, including appropriate administrative, physical, and technical safeguards, to secure such data from unauthorized access, disclosure, alteration, and use. Such measures will be no less protective than those used to secure Contractor’s own data of a similar type, and in no event less than reasonable in view of the type and nature of the data involved. At a minimum, Contractor shall use industry-standard and up-to-date security tools and technologies such as anti-virus protections and intrusion detection methods to protect University Data.

1. Immediately upon becoming aware of circumstances that could have resulted in unauthorized access to or disclosure or use of University Data, Contractor will notify Mason, fully investigate the incident, and cooperate fully with Mason’s investigation of and response to and remediation of the incident. Except as otherwise required by law, Contractor will not provide notice of the incident directly to individuals who’s PII was involved, regulatory agencies, or other entities, without prior written permission from Mason.
2. If Contractor provides goods and services that require the exchange of sensitive University Data, the Data Security Addendum attached to this Contract provides additional requirements Contractor must take to protect the University Data. Mason reserves the right to determine whether the University Data involved in this Contract is sensitive, and if it so determines it will provide the Data Security Addendum to Contractor and it will be attached to and incorporated into this contract. Types of University Data that may be considered sensitive include, but is not limited to, (1) PII; (2) credit card data; (3) financial or business data which has the potential to affect the accuracy of the University’s financial statements; (4) medical or health data; (5) sensitive or confidential business information; (6) trade secrets; (7) data which could create a security (including IT security) risk to Mason; and (8) confidential student or employee information.
3. Mason reserves the right in its sole discretion to perform audits of Contractor, at Mason’s expense, to ensure compliance with all obligations regarding University Data. Contractor shall reasonably cooperate in the performance of such audits. Contractor will make available to Mason all information necessary to demonstrate compliance with its data processing obligations. Failure to adequately protect University Data or comply with the terms of this Contract with regard to University Data may be grounds to terminate this Contract.

QQ. UNIVERSITY DATA UPON TERMINATION OR EXPIRATION: Upon termination or expiration of the Contract, Contractor will ensure that all University Data are securely returned or destroyed as directed by Mason in its sole discretion within 180 days of the request being made. Transfer to Mason or a third party designated by Mason shall occur within a reasonable period of time, and without significant interruption in service. Contractor shall ensure that such transfer/migration uses facilities and methods that are compatible with the relevant systems of Mason or its transferee, and to the extent technologically feasible, that Mason will have reasonable access to University Data during the transition. In the event that Mason requests destruction of its data, Contractor agrees to destroy all data in its possession and in the possession of any subcontractors or agents to which the Contractor might have transferred University Data. Contractor agrees to provide documentation of data destruction to the University.

Contractor will notify the University of any impending cessation of its business and any contingency plans. This includes immediate transfer of any previously escrowed assets and University Data and providing Mason access to Contractor’s facilities to remove and destroy Mason-owned assets and University Data. Contractor shall implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to Mason. Contractor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to Mason. Contractor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and effect on Mason, all such work to be coordinated and performed in advance of the formal, final transition date.

- RR. UNIVERSITY REVIEW/APPROVAL: All goods, services, products, design, etc. produced by the Contractor for or on behalf of Mason are subject to Mason’s review and approval. Notwithstanding anything to the contrary herein, in the event the Mason neglects to provide Contractor with written notice of acceptance or defect within thirty (30) days of completion or receipt of any services, such services shall be deemed accepted by Mason for purposes of this Contract. *BCG would like to clarify that in the event that Mason does not provide timely notice of any defects in the deliverables, then the deliverables shall be deemed accepted.*
- SS. WAIVER: The failure of a party to enforce any provision in this Contract shall not be deemed to be a waiver of such right.
- TT. DISCLAIMER: Notwithstanding the foregoing, Mason acknowledges and agrees that BCG does not provide fairness opinions or valuations of market transactions or legal, accounting, or tax advice. *BCG respectfully requests these clarifications to align this clause with industry standards for comparable consulting services.*
