The Contract does not give a party any rights, implied or otherwise, to the other party's data, content, or intellectual property, except as expressly stated in the Contract.
4. Contractor will take reasonable measures, including audit trails, to protect University Data against deterioration or degradation of data quality and authenticity. Contractor shall be responsible for ensuring that University Data, per the Virginia Public Records Act, is preserved, maintained, and accessible throughout their lifecycle, including converting and migrating electronic data as often as necessary so that information is not lost due to hardware, software, or media obsolescence or deterioration.
5. Contractor shall notify Mason within three business days if it receives a request from an individual under any applicable law regarding PII about the individual, including but not limited to a request to view, access, delete, correct, or amend the information. Contractor shall not take any action regarding such a request except as directed by Mason.
6. If Contractor will have access to University Data that includes "education records" as defined under the Family Educational Rights and Privacy Act (FERPA), the Contractor acknowledges that for the purposes of the Contract it will be designated as a "school official" with "legitimate educational interests" in the University education records, as those terms have been defined under FERPA and its implementing regulations, and the Contractor agrees to abide by the limitations and requirements imposed on school officials. Contractor will use the education records only for the purpose of fulfilling its duties under the Contract for Mason's and its end user's benefit, and will not share such data with or disclose it to any third party except as provided for in the Contract, required by law, or authorized in writing by the University.
7. Mason may require that Mason and Contractor complete a Data Processing Addendum ("DPA"). If a DPA is completed, Contractor agrees that the information in the DPA is accurate. Contractor will only collect or process University Data that is identified in the DPA and will only handle that data (e.g., type of processing activities, storage, security, disclosure) as described in the DPA. If Contractor intends to do anything regarding University Data that is not reflected in the DPA, Contractor must request an amendment to the DPA and may not take the intended action until the amendment is approved and documented by Mason.

PP. UNIVERSITY DATA SECURITY: Data security is of paramount concern to Mason. Contractor will utilize, store and process University Data in a secure environment in accordance with commercial best practices, including appropriate administrative, physical, and technical safeguards, to secure such data from unauthorized access, disclosure, alteration, and use. Such measures will be no less protective than those used to secure Contractor's own data of a similar type, and in no event less than reasonable in view of the type and nature of the data involved. At a minimum, Contractor

shall use industry-standard and up-to-date security tools and technologies such as anti-virus protections and intrusion detection methods to protect University Data.

Immediately upon becoming aware of circumstances that could have resulted in unauthorized access to or disclosure or use of University Data, Contractor will notify Mason, fully investigate the incident, and cooperate fully with Mason's investigation of and response to and remediation of the incident. Except as otherwise required by law, Contractor will not provide notice of the incident directly to individuals who's PII was involved, regulatory agencies, or other entities, without prior written permission from Mason.

If Contractor provides goods and services that require the exchange of sensitive University Data, the Data Security Addendum attached to this Contract provides additional requirements Contractor must take to protect the University Data. Mason reserves the right to determine whether the University Data involved in this contract is sensitive, and if it so determines it will provide the Data Security Addendum to Contractor and it will be attached to and incorporated into this contract. Types of University Data that may be considered sensitive include, but is not limited to, (1) PII; (2) credit card data; (3) financial or business data which has the potential to affect the accuracy of the University's financial statements; (4) medical or health data; (5) sensitive or confidential business information; (6) trade secrets; (7) data which could create a security (including IT security) risk to Mason; and (8) confidential student or employee information.

Mason reserves the right in its sole discretion to perform audits of Contractor, at Mason's expense, to ensure compliance with all obligations regarding University Data. Contractor shall reasonably cooperate in the performance of such audits. Contractor will make available to Mason all information necessary to demonstrate compliance with its data processing obligations. Failure to adequately protect University Data or comply with the terms of this Contract with regard to University Data may be grounds to terminate this Contract.

QQ. UNIVERSITY DATA UPON TERMINATION OR EXPIRATION: Upon termination or expiration of the Contract, Contractor will ensure that all University Data are securely returned or destroyed as directed by Mason in its sole discretion within 180 days of the request being made. Transfer to Mason or a third party designated by Mason shall occur within a reasonable period of time, and without significant interruption in service. Contractor shall ensure that such transfer/migration uses facilities and methods that are compatible with the relevant systems of Mason or its transferee, and to the extent technologically feasible, that Mason will have reasonable access to University Data during the transition. In the event that Mason requests destruction of its data, Contractor agrees to destroy all data in its possession and in the possession of any subcontractors or agents to which the Contractor might have transferred University Data. Contractor agrees to provide documentation of data destruction to the University.

Contractor will notify the University of any impending cessation of its business and any contingency plans. This includes immediate transfer of any previously escrowed assets and University Data and providing Mason access to Contractor's facilities to remove and destroy Mason-owned assets and University Data. Contractor shall implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to Mason. Contractor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to Mason. Contractor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and effect on Mason, all such work to be coordinated and performed in advance of the formal, final transition date.

RR. UNIVERSITY REVIEW/APPROVAL: All goods, services, products, design, etc. produced by the Contractor for or on behalf of Mason are subject to Mason's review and approval.

SS. WAIVER: The failure of a party to enforce any provision in this Contract shall not be deemed to be a waiver of such right.

OO. UNIVERSITY DATA: University Data includes all Mason owned, controlled, or collected PII and any other information that is not intentionally made available by Mason on public websites, including but not limited to business, administrative and financial data, intellectual property, and patient, student and personnel data. Contractor agrees to the following regarding University Data it may collect or process as part of this Contract:

1. Contractor will use University Data only for the purpose of fulfilling its duties under the Contract and will not share such data with or disclose it to any third party without the prior written consent of Mason, except as required by the Contract or as otherwise required by law. University Data will only be processed by Contractor to the extent necessary to fulfill its responsibilities under the Contract or as otherwise directed by Mason.
2. University Data, including any back-ups, will not be accessed, stored, or transferred outside the United States without prior written consent from Mason. Contractor will provide access to University Data only to its employees and subcontractors who need to access the data to fulfill Contractor's obligations under the Contract. Contractor will ensure that employees who perform work under the Contract have read, understood, and received appropriate instruction as to how to comply with the data protection provisions of the Contract and to maintain the confidentiality of the University Data.
3. The parties agree that as between them, all rights including all intellectual property rights in and to University Data shall remain the exclusive property of Mason, and Contractor has a limited, nonexclusive license to use the University Data as provided in the Contract solely for the purpose of performing its obligations under the Contract. The Contract does not give a party any rights, implied or otherwise, to the other party's data, content, or intellectual property, except as expressly stated in the Contract.
4. Contractor will take reasonable measures, including audit trails, to protect University Data against deterioration or degradation of data quality and authenticity. Contractor shall be responsible for ensuring that University Data, per the Virginia Public Records Act, is preserved, maintained, and accessible throughout their lifecycle, including converting and migrating electronic data as often as necessary so that information is not lost due to hardware, software, or media obsolescence or deterioration.
5. Contractor shall notify Mason within three business days if it receives a request from an individual under any applicable law regarding PII about the individual, including but not limited to a request to view, access, delete, correct, or amend the information. Contractor shall not take any action regarding such a request except as directed by Mason.
6. If Contractor will have access to University Data that includes "education records" as defined under the Family Educational Rights and Privacy Act (FERPA), the Contractor acknowledges that for the purposes of the Contract it will be designated as a "school official" with "legitimate educational interests" in the University education records, as those terms have been defined under FERPA and its implementing regulations, and the Contractor agrees to abide by the limitations and requirements imposed on school officials. Contractor will use the education records only for the purpose of fulfilling its duties under the Contract for Mason's and its end user's benefit, and will not share such data with or disclose it to any third party except as provided for in the Contract, required by law, or authorized in writing by the University.
7. Mason may require that Mason and Contractor complete a Data Processing Addendum ("DPA"). If a DPA is completed, Contractor agrees that the information in the DPA is accurate. Contractor will only collect or process University Data that is identified in the DPA and will only handle that data (e.g., type of processing activities, storage, security, disclosure) as described in the DPA. If Contractor intends to do anything regarding University Data that is not reflected in the DPA, Contractor must request an amendment to the DPA and may not take the intended action until the amendment is approved and documented by Mason.

PP. UNIVERSITY DATA SECURITY: Data security is of paramount concern to Mason. Contractor will utilize, store and process University Data in a secure environment in accordance with commercial best practices, including appropriate administrative, physical, and technical safeguards, to secure such data from unauthorized access, disclosure, alteration, and use. Such measures will be no less protective than those used to secure Contractor's own data of a similar type, and in no event less than reasonable in view of the type and nature of

the data involved. At a minimum, Contractor shall use industry-standard and up-to-date security tools and technologies such as anti-virus protections and intrusion detection methods to protect University Data.

1. Immediately upon becoming aware of circumstances that could have resulted in unauthorized access to or disclosure or use of University Data, Contractor will notify Mason, fully investigate the incident, and cooperate fully with Mason's investigation of and response to and remediation of the incident. Except as otherwise required by law, Contractor will not provide notice of the incident directly to individuals who's PII was involved, regulatory agencies, or other entities, without prior written permission from Mason.
2. If Contractor provides goods and services that require the exchange of sensitive University Data, the Data Security Addendum attached to this Contract provides additional requirements Contractor must take to protect the University Data. Mason reserves the right to determine whether the University Data involved in this Contract is sensitive, and if it so determines it will provide the Data Security Addendum to Contractor and it will be attached to and incorporated into this contract. Types of University Data that may be considered sensitive include, but is not limited to, (1) PII; (2) credit card data; (3) financial or business data which has the potential to affect the accuracy of the University's financial statements; (4) medical or health data; (5) sensitive or confidential business information; (6) trade secrets; (7) data which could create a security (including IT security) risk to Mason; and (8) confidential student or employee information.
3. Mason reserves the right in its sole discretion to perform audits of Contractor, at Mason's expense, to ensure compliance with all obligations regarding University Data. Contractor shall reasonably cooperate in the performance of such audits. Contractor will make available to Mason all information necessary to demonstrate compliance with its data processing obligations. Failure to adequately protect University Data or comply with the terms of this Contract with regard to University Data may be grounds to terminate this Contract.

QQ. UNIVERSITY DATA UPON TERMINATION OR EXPIRATION: Upon termination or expiration of the Contract, Contractor will ensure that all University Data are securely returned or destroyed as directed by Mason in its sole discretion within 180 days of the request being made. Transfer to Mason or a third party designated by Mason shall occur within a reasonable period of time, and without significant interruption in service. Contractor shall ensure that such transfer/migration uses facilities and methods that are compatible with the relevant systems of Mason or its transferee, and to the extent technologically feasible, that Mason will have reasonable access to University Data during the transition. In the event that Mason requests destruction of its data, Contractor agrees to destroy all data in its possession and in the possession of any subcontractors or agents to which the Contractor might have transferred University Data. Contractor agrees to provide documentation of data destruction to the University.

Contractor will notify the University of any impending cessation of its business and any contingency plans. This includes immediate transfer of any previously escrowed assets and University Data and providing Mason access to Contractor's facilities to remove and destroy Mason-owned assets and University Data. Contractor shall implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to Mason. Contractor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to Mason. Contractor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and effect on Mason, all such work to be coordinated and performed in advance of the formal, final transition date.

RR. UNIVERSITY REVIEW/APPROVAL: All goods, services, products, design, etc. produced by the Contractor for or on behalf of Mason are subject to Mason's review and approval.

SS. WAIVER: The failure of a party to enforce any provision in this Contract shall not be deemed to be a waiver of such right.

Executive Summary (XIII.A.1.b)

We are pleased to submit this proposal and would be honored to be selected to partner with members of the George Mason University (Mason) community to support important strategic initiatives in the future.

This proposal summarizes the expertise of Melita Consulting, specifically Sara Melita, in two of the areas of need identified in the GMU-1827-23 RFP. The two service areas of focus are:

1. Organizational and operational assessments and improvements; and
2. Academic Leadership assessment and coaching.

This proposal describes how we build quality assurance into the services we deliver and provides a brief list of the types of services available to Mason that would address these two needs.

We also include a more in-depth description of capabilities and qualifications in the references and engagements section which has two parts:

1. Part One – *Highlights* – outlines two specific examples:
 - a. George Washington University Academic Leadership Academy
 - b. University of California, Berkeley Mental Health Services restructuring project

These two projects were selected because they serve as excellent examples that demonstrate the many varied capabilities required to perform well in the two areas of needs (organizational and operational assessments and improvements and Academic Leadership assessment and coaching).

2. Part two – *Summary* – provides an introduction to several projects that serve as examples to demonstrate the diverse experiences Sara Melita has had that would benefit her work at Mason. This part shares brief examples of work with a diverse set of mission-oriented clients and includes references for her academic leader/executive coaching services.

We think it is important to mention that Sara Melita has experience working with social justice-oriented organizations and brings a DEI lens to all her work – including process improvement projects and her coaching clients.

With transparency in mind, we want to mention that several current Mason employees who previously worked at George Washington University could serve as internal references if that would be considered appropriate. One engagement example highlighted in the proposal, the GW Academic Leadership Academy, cites Dr. Melissa Perry (who now serves as Mason's new dean of the College of Health and Human Services) because she was personally involved in the project.

Also, please note that in addition to the references included in this proposal, Sara Melita's [LinkedIn profile](https://www.linkedin.com/in/smelita/) (<https://www.linkedin.com/in/smelita/>) includes feedback from a number of her clients.

We would be grateful for an opportunity to provide Mason an oral presentation to clarify and elaborate on the capabilities and experiences highlighted in this proposal if possible.

We hope you find that this proposal addresses the needs outlined and positions Melita Consulting as a good partner to Mason for work related to both organizational and operational assessments and improvements and academic Leadership assessment and coaching.

Firm Background and Information (XIII.B.3)

Melita Consulting was formed in 2010 by Anthony Melita when he retired from 30 years as a career Federal civil servant. The mission of Melita Consulting has been to make a difference in service to non-profit organizations. From 2010 through 2017, Melita Consulting was a single person business working, by choice, with only a hand full of clients.

Due to the need for schedule flexibility to be available for the needs of aging parents, Sara Melita, transitioned from a full-time position at the George Washington University (GW) to a casual status, focused only on project work.

Since 2018, Sara has been an active member of Melita Consulting working with GW, Howard Hughes Medical Institute, Nonprofit HR, Stepped Care Solutions, Swarthmore College, University of California at Berkeley, and Union College.

As a SWaM eligible “micro” business, this response has a narrow focus as would be expected by a very small (two person) organization. We meet eligibility requirements and are currently in the process of uploading the required SWaM documentation for certification.

We intend to — *stay small* — which means we do not subcontract work and we choose our clients carefully with a focus on organizations, like Mason, who are mission-oriented, because we want to make a difference.

Sara Melita is a consultant, executive coach, facilitator, and trainer passionate about helping individuals, teams, and organizations improve performance. With 25+ years of experience, she has a number of areas of specialty such as academic leadership assessment and coaching, change management, leadership development, organizational and operational assessments and improvements, and strategic planning. We have included her resume as Appendix 4.

Services Overview

Melita Consulting has capabilities, experience, and references to substantiate these lists of services available to Mason in the two areas of need outlined in this proposal. Additionally, we outline strategies for delivering quality services based on best practices in the “approach” section below.

Please note that because this RFP is very broad by design, our response to describe our services is captured at a high-level. To help you measure quality of our services offered and suitability for the intended purpose when the requirements are yet to be defined, we thought it would be appropriate to map out how we approach quality assurance as a general practice.

Organizational and operational assessments and improvements

When it comes to partnering on projects that assess and improve organizations and operations, measuring quality is built into the overall approach and agreed upon at the beginning of each project.

Examples of how we ensure quality include:

- We begin by engaging stakeholders and developing a scope document to gain early alignment on the objectives and critical success factors. We believe this sets teams up for success and helps to keep projects on schedule and on budget while ensuring quality in the process and deliverables.
- We use the scope document to launch a collaboration that results in a project plan that outlines roles and responsibilities, timelines, etc. to ensure expectations are clear. We use the plan to build quality milestones into the process and ensure we pause to reflect on progress and make appropriate course corrections.
- We typically build in quality checkpoints based on the complexity and scope of each project. For example, if the team is large, we may build in a mid-point survey of key stakeholders to evaluate progress.
- We use a “Plus/Delta” process as an ongoing tool to check-in on how the project is going. From debriefing an important meeting to capturing a lessons-learned from a key deliverable, the “Plus/Delta” process builds quality and a focus on continuous improvement into the way we partner. It is a powerful yet simple tool that has us reflect on “what is working that we need to continue doing” and “what needs to change for us to be more effective in the future.”

#1 - George Washington University Academic Leadership Academy (GWALA)

GWALA, now in its third year, was the result of an organizational assessment and improvement initiative. Sara Melita was tapped by the provost at the time to understand and address the need to create a pipeline of qualified academic leaders for important roles. Following a needs assessment and benchmarking best practices, the academy was created.

This example also highlights Sara's deep experience with academic leadership assessment and coaching.

George Washington University Academic Leadership Academy (GWALA).

GWALA is a year-long, cohort-based leadership development program. Sara Melita manages GWALA from nominations and selection through the design and facilitation of the curriculum including asynchronous learning in Blackboard and synchronous in-person sessions on campus.

Sara Melita serves as a coach to the fellows throughout their experience including participation in a 360 multi-rater feedback process and the application of other assessment tools (i.e., conflict styles, decision making, emotional intelligence, MBTI). Her coaching services range from overall academic leadership development and skill building to providing ad hoc, just-in-time problem solving (e.g., faculty conflicts).

More information can be found in the [GWALA section](#) on the GW Academic Leaders Portal.

#2 - University of California, Berkeley Mental Health Services restructuring project

This project began with an organizational assessment and then transitioned into an opportunity to improve process and leadership skills. Sara Melita was brought in by the Director of their Counseling to help them re-envision how they were structured as they were embarking on the implementation of [stepped care 2.0](#) – a transformational model for mental health care.

This example also highlights Sara’s academic leader coaching skills.

University of California, Berkeley (UCB) Mental Health Services Restructuring to enable transformation of service delivery model. UCB embarked on a transformation of their mental health services at a time when demand (and student wait lists) was on the rise. Sara was the designer and project leader tasked to help the leadership team assess their structure and create (and implement) a new model. The shift brought a few services (e.g., Social Services) under a new larger mental health services organizational structure and established a co-director model.

The new model also realigned staff members around, as much as possible, their interests (e.g., outreach) resulting in a more “team” oriented design. This project had plenty of challenges – as all restructuring projects do – but in the end the leadership team was able to push through this important change.

As shared on Sara Melita’s [LinkedIn profile](#), Dr Claytie Davis III, wrote, *“I have had the privilege of working with Sara for the past 2 years. She served as the lead consultant as we undertook the most significant reorganization, to our leadership structure, in my 20+ years at Counseling & Psychological Services, at the University of California, Berkeley. In addition, Sara provided executive coaching to several leadership team members to support our*

stepping into new roles. I was impressed with Sara's ability to support the varied and unique coaching needs of our very diverse team. Sara is a direct communicator and I appreciate her "let's get the job done" attitude; and I also appreciated that she has a sense of humor. I give Sara my highest recommendation."

Approach (XIII.B.5)

Sara Melita has multiple certifications, hands-on experience, and access to numerous “off-the-shelf” (cost-effective) resources to leverage as best practices.

To help clients implement affordable organizational development and effectiveness solutions, Sara utilizes numerous tools such as the Thomas Kilman Conflict Model, Emotional Intelligence 2.0, and Clifton Strengths. She is certified to use numerous tools including: Leadership/Impact® (from Human Synergistics), Korn Ferry Leadership Architect 360 Assessment, and Team Architect, Myers-Briggs Type Indicator (MBTI®), and True Colors (including advanced applications such as Selling, Communication, Teamwork).

Most recently Sara has been using two very cost-effective leadership 360 tools for academic leaders: [Spidergap](#) (fully customizable) and [Leadership Practices Inventory](#).

Sara has used tools to address dysfunctional academic departments and support challenging faculty conflict situations. For example, using the [AUDiT tool](#) developed by the National Center for Principled Leadership & Research Ethics at the University of Illinois at Urbana-Champaign to facilitate discussion, problem solving, and develop recommendations for improving department dynamics.

Sara also has a library of reusable assets from her varied experiences facilitating groups, process improvement initiatives, and training sessions. For example:

- Drawing from best practices from various experts such as for change management, applying models from Kurt Lewin and John Kotter or using agile principles for project management.
- Guiding groups involved in strategic planning efforts to use the traditional SWOT (strengths, weaknesses, opportunities, and threats) framework or the “higher-ed friendly” SOAR (strengths, opportunities, aspirations, and results) model.
- Leading teams in the use of the Scenario Planning process to help them with envisioning their future.

As a general practice, Sara typically begins any project with a needs assessment of some kind that results in a project scope document. Her focus is on building buy-in early from all key stakeholders. She strives to work in an inclusive manner – making sure all voices are heard – to the extent feasible.

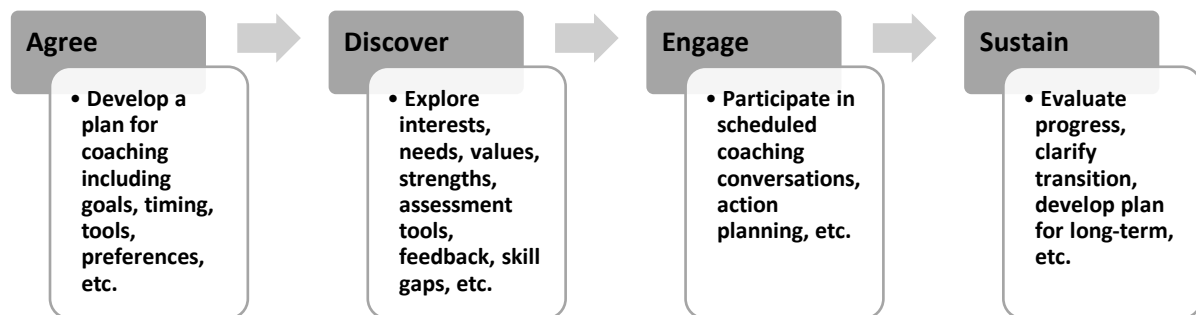

For coaching services, there are two approaches (Ad Hoc and Structured) that Sara outlines for clients in their initial conversation. In both ad hoc and structured coaching, Sara often engages with the leader’s team in some way.

For example:

- Developing and delivering a team training focused on a skill gap (e.g., conflict management, communication, emotional intelligence) that will benefit the leader and their faculty and/or staff
- Planning and facilitating a team retreat to address important topics (e.g., goal setting, process improvement, wellbeing)

For “ad hoc” coaching serves, Sara establishes a coaching agreement to provide help when it’s needed. This “just-in-time” coaching is focused on helping a leader address a specific situation – usually a very challenging situation such as a dysfunctional department. It may also focus on helping a leader build a stronger team, develop their faculty, and staff, or navigate a career transition (e.g., taking on a new role such as an Associate Dean or Chair position).

The structured model is a more traditional approach to leadership coaching. The process generally follows four steps:
