 2. University Data, including any back-ups, will not be accessed, stored, or transferred outside the United States without prior written consent from Mason. Contractor will provide access to University Data only to its employees and subcontractors who need to access the data to fulfill Contractor's obligations under the Contract. Contractor will ensure that employees who perform work under the Contract have read, understood, and received appropriate instruction as to how to comply with the data protection provisions of the Contract and to maintain the confidentiality of the University Data.
 3. The parties agree that as between them, all rights including all intellectual property rights in and to University Data shall remain the exclusive property of Mason, and Contractor has a limited, nonexclusive license to use the University Data as provided in the Contract solely for the purpose of performing its obligations under the Contract. The Contract does not give a party any rights, implied or otherwise, to the other party's data, content, or intellectual property, except as expressly stated in the Contract.
 4. Contractor will take reasonable measures, including audit trails, to protect University Data against deterioration or degradation of data quality and authenticity. Contractor shall be responsible for ensuring that University Data, per the Virginia Public Records Act, is preserved, maintained, and accessible throughout their lifecycle, including converting and migrating electronic data as often as necessary so that information is not lost due to hardware, software, or media obsolescence or deterioration.
 5. Contractor shall notify Mason within three business days if it receives a request from an individual under any applicable law regarding PII about the individual, including but not limited to a request to view, access, delete, correct, or amend the information. Contractor shall not take any action regarding such a request except as directed by Mason.
 6. If Contractor will have access to University Data that includes "education records" as defined under the Family Educational Rights and Privacy Act (FERPA), the Contractor acknowledges that for the purposes of the Contract it will be designated as a "school official" with "legitimate educational interests" in the University education records, as those terms have been defined under FERPA and its implementing regulations, and the Contractor agrees to abide by the limitations and requirements imposed on school officials. Contractor will use the education records only for the purpose of fulfilling its duties under the Contract for Mason's and its end user's benefit, and will not share such data with or disclose it to any third party except as provided for in the Contract, required by law, or authorized in writing by the University.

7. Mason may require that Mason and Contractor complete a Data Processing Addendum (“DPA”). If a DPA is completed, Contractor agrees that the information in the DPA is accurate. Contractor will only collect or process University Data that is identified in the DPA and will only handle that data (e.g., type of processing activities, storage, security, disclosure) as described in the DPA. If Contractor intends to do anything regarding University Data that is not reflected in the DPA, Contractor must request an amendment to the DPA and may not take the intended action until the amendment is approved and documented by Mason.

PP. **UNIVERSITY DATA SECURITY:** Data security is of paramount concern to Mason. Contractor will utilize, store and process University Data in a secure environment in accordance with commercial best practices, including appropriate administrative, physical, and technical safeguards, to secure such data from unauthorized access, disclosure, alteration, and use. Such measures will be no less protective than those used to secure Contractor’s own data of a similar type, and in no event less than reasonable in view of the type and nature of the data involved. At a minimum, Contractor shall use industry-standard and up-to-date security tools and technologies such as anti-virus protections and intrusion detection methods to protect University Data.

1. Immediately upon becoming aware of circumstances that could have resulted in unauthorized access to or disclosure or use of University Data, Contractor will notify Mason, fully investigate the incident, and cooperate fully with Mason’s investigation of and response to and remediation of the incident. Except as otherwise required by law, Contractor will not provide notice of the incident directly to individuals who’s PII was involved, regulatory agencies, or other entities, without prior written permission from Mason.

2. If Contractor provides goods and services that require the exchange of sensitive University Data, the Data Security Addendum attached to this Contract provides additional requirements Contractor must take to protect the University Data. Mason reserves the right to determine whether the University Data involved in this contract is sensitive, and if it so determines it will provide the Data Security Addendum to Contractor and it will be attached to and incorporated into this contract. Types of University Data that may be considered sensitive include, but is not limited to, (1) PII; (2) credit card data; (3) financial or business data which has the potential to affect the accuracy of the University’s financial statements; (4) medical or health data; (5) sensitive or confidential business information; (6) trade secrets; (7) data which could create a security (including IT security) risk to Mason; and (8) confidential student or employee information.

3. Mason reserves the right in its sole discretion to perform audits of Contractor, at Mason’s expense, to ensure compliance with all obligations regarding University Data. Contractor shall reasonably cooperate in the performance of such audits. Contractor will make available to Mason all information necessary to demonstrate compliance with its data processing obligations. Failure to adequately protect University Data or comply with the terms of this Contract with regard to University Data may be grounds to terminate this Contract.

4. Attain Partners – Data Access Security Model

For projects involving sensitive client data, Attain Partners will use a client-centric approach towards satisfying specific data security needs and requirements.

Using this approach, the client will provide Attain Partners with remote access to their environment that meets all necessary security requirements for handling secure data. Attain Partners will use this environment whenever the project requires access to secure data. This means that secure data will not leave the client’s systems.

This approach dramatically limits the risk of data breach and the overall project risk and ensures the only secure information held by Attain Partners, are credentials to the Client System.

The diagrams in Attain’s proposal describe this approach in detail:

- Attain Partners will connect to, and access data from Client Systems, using the most secure means of transmit available.
- The Attain Partners project team will, by policy, conduct all activities that involve or could potentially involve or lead to access to secure client data via this approach. Attain Partners is responsible for properly securing credentials for these systems.
- When data is accessed, it is done exclusively on the Client Systems.

QQ. UNIVERSITY DATA UPON TERMINATION OR EXPIRATION: Upon termination or expiration of the Contract, Contractor will ensure that all University Data are securely returned or destroyed as directed by Mason in its sole discretion within 180 days of the request being made. Transfer to Mason or a third party designated by Mason shall occur within a reasonable period of time, and without significant interruption in service. Contractor shall ensure that such transfer/migration uses facilities and methods that are compatible with the relevant systems of Mason or its transferee, and to the extent technologically feasible, that Mason will have reasonable access to University Data during the transition. In the event that Mason requests destruction of its data, Contractor agrees to destroy all data in its possession and in the possession of any subcontractors or agents to which the Contractor might have transferred University Data. Contractor agrees to provide documentation of data destruction to the University.

Contractor will notify the University of any impending cessation of its business and any contingency plans. This includes immediate transfer of any previously escrowed assets and University Data and providing Mason access to Contractor's facilities to remove and destroy Mason-owned assets and University Data. Contractor shall implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to Mason. Contractor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to Mason. Contractor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and effect on Mason, all such work to be coordinated and performed in advance of the formal, final transition date.

RR. UNIVERSITY REVIEW/APPROVAL: All goods, services, products, design, etc. produced by the Contractor for or on behalf of Mason are subject to Mason's review and approval.

SS. WAIVER: The failure of a party to enforce any provision in this Contract shall not be deemed to be a waiver of such right.

- b. Additionally, the Selected Firm/Vendor will provide the University upon request the results of the above audits, scans and tests, and will promptly modify its security measures as needed based on those results in order to meet its obligations under the Contract. The University may require, at University expense, the Selected Firm/Vendor to perform additional audits and tests, the results of which will be provided promptly to the University.

6. Attain Partners – Data Access Security Model

For projects involving sensitive client data, Attain Partners will use a client-centric approach towards satisfying specific data security needs and requirements.

Using this approach, the client will provide Attain Partners with remote access to their environment that meets all necessary security requirements for handling secure data. Attain Partners will use this environment whenever the project requires access to secure data. This means that secure data will not leave the client's systems.

This approach dramatically limits the risk of data breach and the overall project risk and ensures the only secure information held by Attain Partners, are credentials to the Client System.

University Data will only be processed by Contractor to the extent necessary to fulfill its responsibilities under the Contract or as otherwise directed by Mason.
 2. University Data, including any back-ups, will not be accessed, stored, or transferred outside the United States without prior written consent from Mason. Contractor will provide access to University Data only to its employees and subcontractors who need to access the data to fulfill Contractor's obligations under the Contract.  3. The parties agree that as between them, all rights including all intellectual property rights in and to University Data shall remain the exclusive property of Mason, and Contractor has a limited, nonexclusive license to use the University Data as provided in the Contract solely for the purpose of performing its obligations under the Contract. The Contract does not give a party any rights, implied or otherwise, to the other party's data, content, or intellectual property, except as expressly stated in the Contract.
 4. Contractor will take reasonable measures, including audit trails, to protect University Data against deterioration or degradation of data quality and authenticity. Contractor shall be responsible for ensuring that University Data, per the Virginia Public Records Act, is preserved, maintained, and accessible throughout their lifecycle, including converting and migrating electronic data as often as necessary so that information is not lost due to hardware, software, or media obsolescence or deterioration.
 5. Contractor shall notify Mason within three business days if it receives a request from an individual under any applicable law regarding PII about the individual, including but not limited to a request to view, access, delete, correct, or amend the information. Contractor shall not take any action regarding such a request except as directed by Mason.
 6. Contractor will use the education records only for the purpose of fulfilling its duties under the Contract for Mason's and its end user's benefit, and will not share such data with or disclose it to any third party except as provided for in the Contract, required by law, or authorized in writing by the University.
 7. Mason may require that Mason and Contractor complete a Data Processing Addendum ("DPA"). If a DPA is completed, Contractor agrees that the information in the DPA is accurate. Contractor will only collect or process University Data that is identified in the DPA and will only handle that data (e.g., type of processing activities, storage, security, disclosure) as described in the DPA. If Contractor intends to do anything regarding University Data that is not reflected in the DPA, Contractor must request an amendment to the DPA and may not take the intended action until the amendment is approved and documented by Mason.
- PP. UNIVERSITY DATA SECURITY: Data security is of paramount concern to Mason. Contractor will utilize, store and process University Data in a secure environment in accordance with commercial best practices, including appropriate administrative, physical, and technical safeguards, to secure such data from unauthorized access, disclosure, alteration, and use. Such measures will be no less protective than those used to secure Contractor's own data of a similar type, and in no event less than reasonable in view of the type and nature of

the data involved. At a minimum, Contractor shall use industry-standard and up-to-date security tools and technologies such as anti-virus protections and intrusion detection methods to protect University Data.

1. Immediately upon becoming aware of circumstances that could have resulted in unauthorized access to or disclosure or use of University Data, Contractor will notify Mason, fully investigate the incident, and cooperate fully with Mason's investigation of and response to and remediation of the incident. Except as otherwise required by law, Contractor will not provide notice of the incident directly to individuals who's PII was involved, regulatory agencies, or other entities, without prior written permission from Mason.
2. If Contractor provides goods and services that require the exchange of sensitive University Data, the Data Security Addendum attached to this Contract provides additional requirements Contractor must take to protect the University Data. Mason reserves the right to determine whether the University Data involved in this Contract is sensitive, and if it so determines it will provide the Data Security Addendum to Contractor and it will be attached to and incorporated into this contract. Types of University Data that may be considered sensitive include, but is not limited to, (1) PII; (2) credit card data; (3) financial or business data which has the potential to affect the accuracy of the University's financial statements; (4) medical or health data; (5) sensitive or confidential business information; (6) trade secrets; (7) data which could create a security (including IT security) risk to Mason; and (8) confidential student or employee information.
3. Mason reserves the right in its sole discretion to perform audits of Contractor, at Mason's expense, to ensure compliance with all obligations regarding University Data. Contractor shall reasonably cooperate in the performance of such audits. Contractor will make available to Mason all information necessary to demonstrate compliance with its data processing obligations. Failure to adequately protect University Data or comply with the terms of this Contract with regard to University Data may be grounds to terminate this Contract.

QQ. UNIVERSITY DATA UPON TERMINATION OR EXPIRATION: Upon termination or expiration of the Contract, Contractor will ensure that all University Data are securely returned or destroyed as directed by Mason in its sole discretion within 180 days of the request being made. Transfer to Mason or a third party designated by Mason shall occur within a reasonable period of time, and without significant interruption in service. Contractor shall ensure that such transfer/migration uses facilities and methods that are compatible with the relevant systems of Mason or its transferee, and to the extent technologically feasible, that Mason will have reasonable access to University Data during the transition. In the event that Mason requests destruction of its data, Contractor agrees to destroy all data in its possession and in the possession of any subcontractors or agents to which the Contractor might have transferred University Data. Contractor agrees to provide documentation of data destruction to the University.

Contractor will notify the University of any impending cessation of its business and any contingency plans. This includes immediate transfer of any previously escrowed assets and University Data and providing Mason access to Contractor's facilities to remove and destroy Mason-owned assets and University Data. Contractor shall implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to Mason. Contractor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to Mason. Contractor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and effect on Mason, all such work to be coordinated and performed in advance of the formal, final transition date.

RR. UNIVERSITY REVIEW/APPROVAL: All goods, services, products, design, etc. produced by the Contractor for or on behalf of Mason are subject to Mason's review and approval.

SS. WAIVER: The failure of a party to enforce any provision in this Contract shall not be deemed to be a waiver of such right.

4.0 Approach (Section XIII.B.5)

Specific plans or methodology to be used to perform the services.

Attain Partners has provided, in this section, specific plans or methodology to be used to perform the outlined services. Only those services of which Attain Partners is bidding on as referenced in the RFP (Section XI.B) are listed and detailed herein.

4.1 Higher Education Benchmarking and Data Analysis (Section XI.B.1)

[Section XIII.B.5] As part of benchmarking services, Attain Partners will use various inputs and data sources to define and document national, regional, and local trends in higher education. Some of these sources include, but are not limited to:

- ▶ **U.S. Census Bureau Data** – The Census Bureau publishes current and projected population at the national, regional, and local levels.
- ▶ **U.S. Bureau of Labor Statistics** – The Bureau of Labor Statistics measures labor market activity, price changes, and productivity in the U.S. economy, and also publishes a variety of statistics including but not limited to industry, occupation, demographics, and more.
- ▶ **National Center for Education Statistics (NCES)** – NCES is part of the U.S. Department of Education and has data spanning many years on educational institutions and students.
- ▶ **Education Research and Data Center (ERDC)** – ERDC links education and workforce data from multiple state agencies to provide insights that inform decision-makers.
- ▶ **Thought Leadership Articles and Papers** – Similar to academic research, numerous academics, the policy makers, and other educational leaders have published thought leadership articles and white papers on the current and future state of higher education.

[Section XIII.B.5] In addition, Attain Partners has several proprietary benchmarking tools that provide valuable aggregated data and information on higher education institutions across many functions, including the following, which can be coupled with assessment and other services noted within this section of the proposal.

- ▶ **Attain Research Performance** – an intuitive Software as a Service (SaaS) product that analyzes the performance of research institutions. With over 40 years of extensive experience and leadership in understanding the financial performance of sponsored programs, Attain Research Performance supplies clients with industry-leading analyses down to the staff level and across multiple years, all while minimizing expense, workload, and the need for technical expertise.
- ▶ **Attain Strategic Finance Performance (SFP)** – premier financial expertise packaged in an automated tool, SFP captures the approach of Attain's proprietary Strategic Financial Analysis for Higher Education and enables institutions to review and understand their Composite Financial Index (CFI), Primary Ratios, and Secondary Ratios through visually appealing graphs, interactive formula displays, and a tailored set of recommendations.

4.2 Financial Analysis and Budget Planning; Business and Financial Modeling (Sections XI.B.3 and XI.B.10)

[Section XIII.B.5] The measurement of an institute's financial health, knowledge of the resources available to deploy against its strategic objectives and understanding the key financial levers that impact fiscal stewardship and effective budgeting are essential drivers for mission success. Attain Partners, in collaboration with KPMG and Prager Sealy, published the *Strategic Financial Analysis for Higher Education: Identifying, Measuring & Reporting Financial Risks, 7th Edition*, which establishes a proprietary strategic financial analysis (SFA) framework that leverages the Composite Financial Index (CFI). The CFI evaluates the total financial health, balances an institution's financial position with its operating results, and provides insights into which strategic priorities and/or objectives are most profitable.

[Section XIII.B.5] Attain Partners can leverage proprietary tools like strategic financial measurements, an academic performance model, and peer database information, to conduct an analysis and benchmarking of an institution's financial structures and performance.

- ▶ Strategic Financial Measurements
- ▶ Academic Program Financial Performance Model
- ▶ Benchmarking

[Section XIII.B.5] Analysis begins with review of financial and other relevant documentation and includes engagement with key stakeholders to understand the opportunities and challenges facing the institution. This allows the Attain Partners team to identify additional measures and/or key metrics to track based on the SFA framework.

4.3 Organizational and Operational Assessments and Improvements (Section XI.B.6)

[Section XIII.B.5] When planning for potential organizational restructuring or operational transformation, it is important to obtain a holistic perspective across people, processes, and technologies to ensure a framework is setup to best meet stakeholder needs. We believe Attain Partners' approach will bring the highest value to ensure people, processes, and technologies are optimally structured to best serve stakeholders. Our phased approach enables the Attain Partners team to systematically review and analyze operations across any function within an institution.

Figure 4: Attain Partners Assessment Approach

[Section XIII.B.5] The first planning phase allows the Attain Partners team to understand the key outcomes desired, align on the project approach, and coordinate activities with Mason's project sponsor and project liaison. This critical step ensures a common understanding of the goals and methodology for the project, commitment of appropriate resources, and an established framework for execution.

[Section XIII.B.5] The second phase entails a detailed current state analysis. The review can encompass as few or as many functional areas as Mason is interested in, including Information Technology, student services, facilities, finance, human resource, and more. For each functional area identified as part of scope for analysis, the Attain Partners team will begin with a detailed documentation review to quantify current staffing levels, job descriptions, organization charts, management reports, departmental budgets, and

published policies and procedures. In addition, the Attain Partners team will interview representative management, supervisors, staff, and key campus constituents and stakeholders to gather information about current processes and workflows. These activities will inform our high-level understanding of existing processes within each operational area, pain points/inefficiencies, and roles and responsibilities of those individuals involved in the process activities.

[Section XIII.B.5] As an optional phase that can be included as requested, Attain Partners will work with Mason to identify an agreed upon number of peer institutions to benchmark against. We will study the comparable institutions to determine if any learnings can be instructive as it relates to exploring alternate service delivery models (e.g., decentralized versus centralized models, shared service models, etc.).

[Section XIII.B.5] Upon completion of data gathering and fieldwork, the Attain Partners team will compile gathered information and commence report writing. A comprehensive report will be provided to Mason and will cover the following areas:

- ▶ Evaluation of the overall effectiveness of the administrative systems in supporting Mason's operations
- ▶ Benchmarking (as requested) compared to peer institutions
- ▶ Key Performance Indicators (KPIs) for each focus area
- ▶ Observations and recommendations on opportunities for upskilling, training, reorganization, and process improvements, and evaluation of the feasibility
- ▶ A roadmap for implementation recommendations

[Section XIII.B.5] Attain Partners will also prepare a high-level overview presentation to report to the executive level members of Mason.

4.4 Strategic Communication and Change Management of New Initiatives or Joint Ventures (Section XI.B.8)

[Section XIII.B.5] It is through early and often interaction with stakeholders that organizations are able to gain insight, buy-in, and excitement for new and transformational initiatives or joint ventures. Attain Partners provides change management services that employ proprietary change management methodology that is centered on the basic principle that transformation begins with the individual. Our methodology, which leverages Prosci® best practices and research, begins with a customized change management approach that defines the strategy for the duration of a project and focuses on the following objectives that enable our Prosci® certified change management practitioners to define and guide stakeholders across the change curve through adoption and post-implementation:

- ▶ Document the desired change management outcome
- ▶ Identify the success factors required to effectively execute and sustain the desired, transformative outcomes associated with the new initiatives or new partnership joint ventures
- ▶ Identify the change management tools and techniques that will be utilized to effectuate the change

Figure 5: Attain Partners Change Management Approach

[Section XIII.B.5] The Attain Partners change management approach includes an arsenal of tools that have proven to be effective at leading transformational change within organizations. The following figure illustrates the change management tools that are typically included within Attain Partners change management services: sponsor roadmap, stakeholder analysis, change impact assessment, stakeholder engagement plan, and a training plan.

Figure 7: Attain Partners Representative Client List

4.6 Extensive Transactional Experience, Including Mergers and Acquisitions, in Higher Education: Please Provide Sample Deal List (Section XI.B.15)

[Section XIII.B.5] Attain Partners approach to transactional analysis, including mergers and acquisitions, consists of three phases: documentation review and research, strategic financial analyses, and reporting. As part of the approach, The Attain Partners team leverages the Strategic Financial Analysis (SFA) framework, which leverages the Composite Financial Index (CFI). In turn, the CFI evaluates total financial health, balances and Institution's financial position with its operating results, and provides insights into which strategic priorities and/or objectives are most profitable.

[Section XIII.B.5] The first phase entails gathering financial statements of any target institutions. The Attain Partners team will perform sentiment analysis of the target institution(s) from publicly available sources as well as gather necessary demographic information that will aid in the evaluation of an acquisition or merger (e.g., campus sites, facilities, academic programming, faculty and staff headcount, etc).

[Section XIII.B.5] We will then leverage two proprietary tools in the second phase to assess the financial health of the target institution(s) – strategic financial measurements and an academic program financial performance model. These are supplemented by benchmarking data from our proprietary database as well as nationally available sources, such as the National Center for Educational Services (NCES) and the Association of Physical Plant Administrators (APPA). Analysis commences with the inputting of audited financial data into the Attain Partners Strategic Financial Performance (SFP) tool for both Mason and the target institution(s), which allows the team to assess overall financial health of the target, compare it to that of Mason, and initiate a discussion around result drivers. General perspectives on the overall financial health of a hypothetically merged institution will be provided based on available data, which will allow Attain Partners to begin "scenario" planning with Mason. The overall outcome of this analysis will be to complete the Ratio Map (RM), which shows the range of ratios used to create baseline information that gauges the financial health, the Composite Financial Index (CFI), which combines four high-level ratios to determine a single score of financial health, and the Graphic Financial Profile (GFP), which provides a single picture that charts those four ratios.

[Section XIII.B.5] The final phase will consist of the creation of a presentation of the core financial ratios, the CFI, and the GFP. These will be supported by subsidiary ratios. The presentation will also explain each measure in terms of the target institution's financial health, and how the results are impacted in the context of events that have occurred or may occur over the period of the study. Recommendations on strategies that Mason can execute as it moves forward in evaluating potential mergers or acquisitions will be provided as part of the final report presentation.

Deal lists from clients are proprietary and cannot be shared as part of this proposal.

4.7 Extensive Experience in Developing and Growing DEI Initiatives in Higher Education (Section XI.B.16)

Attain Partners understands the significance of an institutional commitment to furthering and fostering diversity, equity, and inclusion (DEI) as a pillar of the campus community. Through our prior work DEI work in higher education, Attain Partners has experience in helping universities with the recruitment and retention of diverse talent, the cultivation of a welcoming and inclusive campus climate, and the advancement of enduring internal and external partnerships.

A key starting point to DEI engagements includes understanding where an institution stands on its journey and additional actions needed to continue to grow into a campus of belonging and inclusion.

Attain Partners leverages its proprietary Inclusion, Diversity, Equity, and Allyship (IDEA) Performance Maturity Framework™ to perform a current state assessment of all DEI activities across an institution. Mirroring the three phased approach noted in Section 4.3 of this proposal, the Attain Partners team works closely with DEI leaders and practitioners across Mason to align on anticipated outcomes, the project approach, and coordinated activities. This detailed current state analysis includes a comprehensive review of all documentation, such as policies and procedures, organizational charts, DEI-related budgets, DEI strategic plans, prior climate and diversity survey results and information related to existing programming and training. In addition, the Attain Partners team conducts interviews and focus groups across a wide range of representative stakeholders to better understand perceptions of past and current initiatives as well as strengths and opportunities for current and future activities.

Once all data is gathered and analyzed, information is inputted into the IDEA Performance Maturity Tool, which calculates an institutional score that aligns with a level within the maturity continuum.

Attain Partners provides an assessment report that details findings of the analysis. Included in this actionable report are identified DEI strengths and weaknesses, and organizational recommendations. The report is structured to guide Mason's activities for the next three to five years.

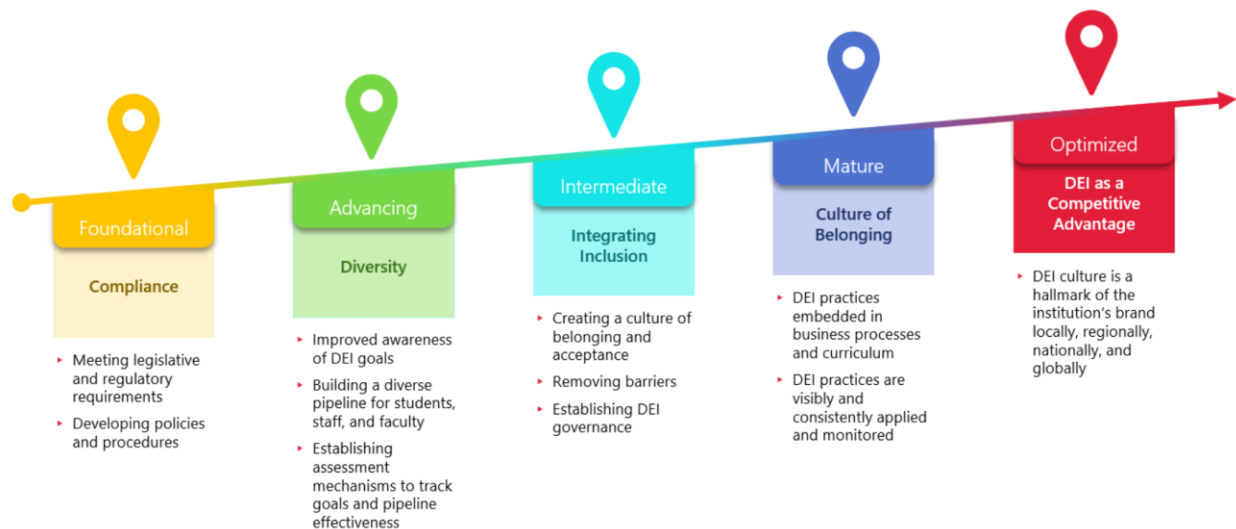

Figure 8: Attain Partners IDEA Performance Maturity Framework

As additional options that can be included per request, the Attain Partners team can assist Mason in developing a robust roadmap, or high-level tactical blueprint, that details how identified goals and recommendations will be implemented over time. This roadmap incorporates all the organizational recommendations from the DEI assessment to form the basis that aligns identified priorities to annualized outcomes and measurable objectives. The implementation roadmap will also outline a feedback plan to ensure that stakeholders identified in the assessment remain informed during the implementation of strategic initiatives. The roadmap will include a project management framework to manage all implementation activities. A clear roadmap has several purposes:

- ▶ Identifies the planned actions for the stated outcomes related to strategic priorities
- ▶ Incorporates an accountability framework both in the short- and longer-term, integrating SMART (Specific, Measurable, Attainable, Relevant [or Responsible] Party, and Timeline) indicators of performance
- ▶ Communicates operating priorities, roles, and responsibilities over time, with line of sight

- ▶ Engages the community to ensure continual feedback loops

During the roadmap development, actions and recommendations will be refined, associated with identified investments to support outcomes, and aligned to a reasonable timeline, with interim targets and measures earmarked on an annualized basis.

4.8 Agility and Reach – Ability to Assemble a Relevant Team of Education Experts Quickly; Strong Network (Section XI.B.17)

Refer to the Section 3.2 of this proposal for an illustration of Attain Partners' ability to assemble a relevant team of education experts quickly and a strong network.

5.0 Cost of Services (Section XIV.A.4)

5.1 Hourly Rates

[Section XIV.A.4] Attain Partners' fees for professional services will be provided on a time and materials basis. The billing rate for each Attain Partners staff category aligns with our current Master Services Agreement number VTS-1077-2019, and is as follows:

Subject Matter Expert	\$275
Principal / Senior Principal	\$250

[Section XIV.A.4] Billing for our services will be based on actual hours worked, unless otherwise noted in individual statements of work. Accordingly, the fee amount will only be billed for the services provided. Invoices will be submitted monthly. Per section XVI. Payment Terms/Method of Payment of the RFP, Attain Partners prefers Option #3, Net 30 Payment Terms.

Higher Education and Their Contractors. Neither the existence of a claim nor a dispute resolution process, litigation or any other provision of this Contract shall excuse the Contractor from promptly complying with the changes ordered by Mason or with the performance of the contract generally.

- K. CLAIMS: Contractual claims, whether for money or other relief, shall be submitted in writing no later than 60 days after final payment. However, written notice of the Contractor's intention to file a claim shall be given at the time of the occurrence or beginning of the work upon which the claim is based. For purposes of this section, "drug-free workplace" covers all sites at which work is done by Contractor in connection with this Contract.
- T. **ENTIRE CONTRACT:** This Contract constitutes the entire understanding of the Parties with respect to the subject matter herein and supersedes all prior oral or written contracts with respect to the subject matter herein. Attain Partners – Data Access Security Model

For projects involving sensitive client data, Attain Partners will use a client-centric approach towards satisfying specific data security needs and requirements.

Using this approach, the client will provide Attain Partners with remote access to their environment that meets all necessary security requirements for handling secure data. Attain Partners will use this environment whenever the project requires access to secure data. This means that secure data will not leave the client's systems.

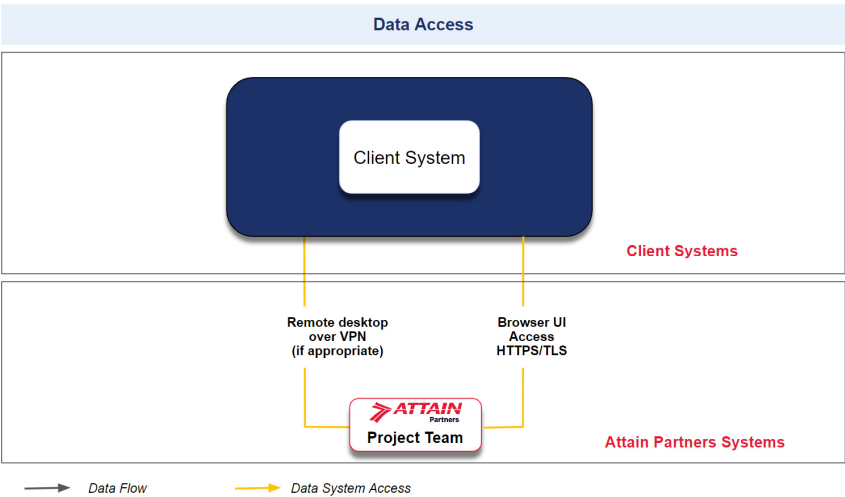

This approach dramatically limits the risk of data breach and the overall project risk and ensures the only secure information held by Attain Partners, are credentials to the Client System.

The below diagrams describe this approach in detail:

- Attain Partners will connect to, and access data from Client Systems, using the most secure means of transmit available.
- The Attain Partners project team will, by policy, conduct all activities that involve or could potentially involve or lead to access to secure client data via this approach. Attain Partners is responsible for properly securing credentials for these systems.
- When data is accessed, it is done exclusively on the Client Systems.
